The College of Charleston is committed to providing leadership in the attainment of equal opportunity for all persons regardless of race, religion, sex, national origin, age, disability, or sexual orientation. This effort is in compliance with all federal and state laws, including Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 503 and 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975 as amended, and the Americans with Disabilities Act; inquiries should be directed to the Office of Human Relations and Minority Affairs, College of Charleston, Charleston, South Carolina 29424-0001, 843-953-5580.

In order to establish equal opportunity for all persons, the Office of Human Relations and Minority Affairs ensures immediate response to complaints of discrimination based on sex, race, religion, national origin, creed, disability, age and sexual orientation by students, employees, and/or applicants for employment and admission. The director for the Office of Human Relations and Minority Affairs is responsible for coordinating the grievance procedures under the Affirmative Action Program and federal equal opportunity guidelines.

In addition to offering a broad range of baccalaureate degree programs, the College offers master’s degrees and graduate certificates that take advantage of the unique opportunities provided by the people, institutions, and environment of the South Carolina Lowcountry and that offer the specialized knowledge and training sought by professionals living and working in the region.

Freshman Admissions (degree seeking)

A freshman applicant is a person who has not attended a university, college, or technical school. Applicants who attended a post-secondary institution while still in high school are also classified as freshmen.

Freshman applicants must have earned either a high school diploma or its equivalent, the General Educational Development Test (GED), prior to enrollment. The results of the GED will normally be used in place of the high school diploma only if the applicant left secondary school at least two years before intended enrollment at the College of Charleston. The minimum acceptable GED score for admission is the score used for awarding an equivalent secondary school diploma in the state where the test was taken. All students are required to submit final transcripts verifying graduation or, if a GED is submitted in place of the high school diploma, the most recent semester of high school attendance.

Applicants for freshman admission must submit:
1. A completed application form with a nonrefundable application fee.
2. Official high school records complete up to the time of application.
3. Results (including the writing assessment) of the Scholastic Assessment Tests (SAT I) or American College Testing Program (ACT).* Admissions candidates must request that the results of the tests be sent to the College of Charleston. The College’s ACT code no. is 3846 and SAT code no. is 5113.
4. Students choosing to complete the SAT I will not be required to submit the results of the SAT II (subject tests). If submitted, however, the College may use them for placement purposes. International students from non-English speaking countries may submit a TOEFL score in lieu of SAT I or ACT results. In spring 2010, the College of Charleston will require both the TOEFL (or the IELTS) and the SAT for international students from non-English speaking countries.
5. Students who completed post-secondary work, including dual-credit, while in high school must submit official transcripts of their college work whether or not they expect to receive credit.

* NOTE: The admissions committee can make no decision until the SAT or ACT score has been received. When selecting a test date, please bear in mind that it takes approximately four weeks from the test date for the scores to reach the Office of Admissions.

The College of Charleston requires that applicants for freshman admission complete certain courses in high school before admittance. These requirements are listed below. Course content and specific requirements are outlined at: www.cofc.edu/admissions

Decision-Making Process

Both quantitative and qualitative components guide the Office of Admissions in reaching their final decisions on applicants. The admissions committee weighs carefully the student’s academic preparation (which includes grades, rank in class, and rigor of courses taken), SAT I/ACT results, personal statements, leadership qualification and special talents. A slightly higher profile is required of out-of-state students.

Admissions Procedures
For freshman applicants www.cofc.edu/admissions

For transfer students

Students who have previously attended either a two-year or four-year college should apply as transfer students. For information on transfer credit policies and equivalencies, admissions criteria, scholarships, and application procedures, go to www.cofc.edu/admissions. The College of Charleston policy related to the statewide transfer articulation of coursework from SC two-year colleges is also located at this website.

For readmit students

The College of Charleston welcomes qualified students who previously attended to apply for readmission. Students who wish to return to the College of Charleston after an absence of one or more semesters (excluding summers) and who have not been on an approved leave of absence must apply for readmission. Requirements for readmission vary depending on whether or not the student held a cumulative GPA of 2.0 or greater at the time of leaving the College. All students are required to complete a health form and show proof of immunization. Health forms may be downloaded at our website at http://cofc.edu/~stuhealth/. Physical exams are not required.
Placement

International Baccalaureate Program

Students who have taken college-level courses in secondary school and who have achieved a score of 4, 5, 6, or 7 on a higher-level IB examination will be awarded credit. Refer to the website for specific credit equivalencies: www.cofc.edu/admissions.

College Entrance Examination Board

Advanced Placement Examinations

The Advanced Placement Program of the College Entrance Examination Board is accepted at the College of Charleston. Students who have taken college-level courses in secondary school and who have achieved a score of 3, 4, 5, or 6 on an advanced placement examination will be awarded advanced placement credit. No more than six to eight credits will be granted in any one discipline area. With regard to this policy, history is defined as consisting of two disciplines—American history and European history. For information on specific AP courses, please contact the Office of Admissions or visit our website. The College of Charleston's placement tests and departmental interviews may be required for final awarding of credit.

College Entrance Examination Board

College Level Examination Program (CLEP)

The CLEP Subject Examinations accepted by the College of Charleston for credit and placement are listed on the website.

The passing grade for each examination will be the score recommended for credit by the academic department at the College. When the credit is given, the student’s record will show that the credit comes from a CLEP examination. No native speaker of a language other than English will be awarded foreign language credit for proficiency in his or her first language. Further information about CLEP should be obtained from the counseling center or the website. For information on specific CLEP courses, please contact the Office of Admissions.

College of Charleston

Languages Department Policy

on Placement Credit

To fulfill the language requirement, entering students may take any language, other than English and Hindi, offered by the College. However, students who wish to continue a language studied in high school or elsewhere must take a placement test (approved by the department) in the language unless they have scored a 3 or higher on the AP language test. Note that students of Spanish do not take a placement test, rather are placed according to their years of high school study of the language (see http://lwca.cofc.edu/hispanicstudies for placement procedures). The placement test score determines the level at which the student will continue his or her study of the language. Transfer students with college credit in a foreign language, who wish to continue in the same language, should not take the placement exam, and will not receive College of Charleston placement credit if the placement exam is taken. Transfer students with college credit in a foreign language, who wish to continue in a different language, should take the placement exam.

Credit through placement may be earned for only one language, and no more than a total of 12 placement credits in that language will be awarded. Students may earn credits through placement tests as described below:

1. If the student places in, and subsequently passes, the LANG 102 or LANG 105 course with a grade of “C” (2.0) or higher, six credits will be granted for the 101 and 102/105 courses. The validation course must be completed within the first two semesters of study at the College.
2. If the student places in, and subsequently passes, the LANG 201 course with a grade of “C” (2.0) or higher, nine credits will be granted for the 101, 102, and 201 courses. The validation course must be completed within the first two semesters of study at the College.
3. If the student places in, and subsequently passes, the LANG 202 course with a grade of “C” (2.0) or higher, 12 credits will be granted for the 101, 102, 201, and 202 courses. The validation course must be completed within the first two semesters of study at the College.
4. If the student places in, and subsequently passes, a 300-level course with a grade of “C” (2.0) or higher, 15 credits will be granted for the 101, 102, 201, 202, and the 300-level course. The validation course must be completed within the first two semesters of study at the College.
5. Students who pass but do not receive a grade of “C” (2.0) or higher in the validation course will receive only the three credits for the validation course.
6. Students who place in a 300-level course will have satisfied the College’s minimum degree requirement in languages whether or not they take a validation course.

Advanced Placement (CEEB)

The Advanced Placement (AP) Program of the College Entrance Examination Board (CEEB) is accepted by the College of Charleston. A student who has taken college-level courses in foreign language or literature will be awarded advanced placement (AP) credit in accordance with the following scale:

AP Modern Language Test (French, German, Italian, Spanish)

4 or 5: six semester hours credit for 202-and 300-level course (FREN 390, GRMN 390, ITAL 390, SPAN 313)
3: six semester hours credit for 201 and 202

A score of three or higher fulfills the general education requirement in a foreign language. Student may enroll in an advanced language course.

AP Literature Test (French, German, Spanish)

4 or 5: six semester hours credit for 202 and 300-level literature course (FREN 324, GRMN 365, SPAN 320)
3: six semester hours credit for 201 and 202

A score of three or higher fulfills the general education requirement in a foreign language. Student may enroll in an advanced literature course.

AP Latin Test (all forms):

4 or 5: six semester hours credit for 202 and LATN 390
3: six semester hours credit for 201 and 202

A score of three or higher fulfills the general education requirement in a foreign language. Student may enroll in an advanced language course.

Note: Students who have scored a 3 or higher on an advanced placement language test should not take the College of Charleston placement test in that language. Students may enroll directly into a 300-level language course. Students who receive advanced placement (AP) credits and elect to take an additional course in that language at the College may be eligible to receive College of Charleston placement credits (see “Policy on Placement Credit” above).

Satisfactory Academic Progress (SAP) Policy for Financial Aid Eligibility

All federal financial assistance programs are authorized under Title IV of the Higher Education Act of 1965 as amended, and require the establishment of minimum standards of academic progress that students must meet to maintain general eligibility for financial aid. While students meeting these standards are generally eligible for aid, some aid programs require higher standards that may preclude the student from qualifying for those programs.

The College of Charleston/The Graduate School of the College of Charleston SAT/ACT Policy for Financial Aid Eligibility applies to all aid programs administered by or through the Office of Financial Assistance and Veterans Affairs. These guidelines apply to all students seeking or receiving assistance, whether or not aid may have been received previously. All students must be admitted to and eligible to enroll in an approved degree/certificate program of study. Non-degree students are not eligible for federal and state aid programs.

Undergraduate Students

The term undergraduate students refers to students pursuing their first or subsequent undergraduate degree(s), teacher certification, multiple majors, and/or minor concentrations.

Qualitative Standards: Students must meet the minimum criteria listed below:

<table>
<thead>
<tr>
<th>Year</th>
<th>Cumulative % of hours completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>65%</td>
</tr>
<tr>
<td>2</td>
<td>70%</td>
</tr>
<tr>
<td>3</td>
<td>75%</td>
</tr>
<tr>
<td>4 or more</td>
<td>80%</td>
</tr>
</tbody>
</table>

The minimum cumulative percentage of credit hours completed does not include any hours attained through advanced placement, CLEP, or transfer credits. Other credit hours not included in the minimum cumulative percentage of credit hours completed are non-hourly, audit or non-credit courses, e.g., co-operative education experiences, developmental and continuing education courses.

Time Limitation Quantitative Standards:

Undergraduate students (as defined above) who have attempted 183 credit hours (including transfer, advanced placement, and CLEP credits) will cease to be eligible for financial aid. A student’s credit hours are assessed incrementally at the end of fall, spring, and summer terms.

The total credit hours (inclusive of transfer, AP, CLEP, etc.) posted as earned hours must be included when determining the appropriate qualitative standard cumulative GPA for each incremental assessment. Since the acceptance of transfer credits can occur at any time, the transfer student’s standards may differ from one assessment period to another.

Incremental Quantitative Standards:

Students must earn a minimum percentage of cumulative hours attempted to demonstrate satisfactory academic progress toward degree completion. Attempted hours in excess of 12 in any term are not counted against the student in this calculation. The annual assessment occurs after spring grades are posted. The required percentages are on a graduated scale based on the number of years in school as indicated below:

The minimum cumulative percentage of credit hours completed does not include any hours attained through advanced placement, CLEP, or transfer credits. Other credit hours not included in the minimum cumulative percentage of credit hours completed are non-hourly, audit or non-credit courses, e.g., co-operative education experiences, developmental and continuing education courses.

Time Limitation Quantitative Standards:

Undergraduate students (as defined above) who have attempted 183 credit hours (including transfer, advanced placement, and CLEP credits) will cease to be eligible for financial aid. A student’s credit hours are assessed incrementally at the end of fall, spring, and summer terms.
General SAP Policies and Procedures

Withdrawal: Any student withdrawing from coursework will be evaluated based on the minimum number of credit hours attempted at the point of aid disbursement, e.g., a student enrolled in 18 hours and withdraws from 6, the evaluation is based on 12 hours. Anything less than 12 hours will have an adverse effect.

SAP Probation: Students who do not meet the SAP standards minimum grade point average and/or have not completed the required percentage of hours will be placed on SAP probation for the next incremental assessment period (one 12-month period beginning with Maymester). Students placed on probation are encouraged to meet with their academic advisor to develop a plan for making up deficiencies within the next incremental assessment period.

Termination of Aid: Students who are dismissed from the College of Charleston for any reason are terminated from financial aid. Students who do not meet the SAP standards for financial aid eligibility as of the end of the SAP probation period will be terminated from financial aid until they are again in full compliance.

Readmit Policy: Students applying for readmission to the College are eligible for financial aid if: 1) they meet the SAP standards in effect at the time of readmission, or 2) after they have successfully completed the terms of their readmission contract. This policy may not be appealed. Students in category 2 who have not attended the College for two or more years prior to being readmitted are not required to do a SAP appeal. However, they must have remaining aid eligibility.

Reinstatement of Aid: Students who are terminated from financial aid may submit an appeal for reinstatement of eligibility when they have mitigating circumstances beyond their control, which have resulted in deficiencies that could not be made up while on SAP probation. Such circumstances include the student’s injury or illness, death of a relative, or other special circumstances. In cases where the student and/or the student’s family lives in an area that has been officially declared a national disaster area, an appeal may be filed.

Appeal forms for reinstatement of eligibility are available from the Office of Financial Assistance and Veterans Affairs’ website at www.cofc.edu/finaid. Appeals for reinstatement of eligibility are the responsibility of the student. The appeal must be submitted within the published calendar of appeal and include the term for which reinstatement is requested. Appeals must specifically reflect the unique circumstances that were beyond the control of the student. The appeal should provide specific resolution to circumstances and supporting documentation as indicated on the appeal form.

Students appealing for reinstatement of eligibility remain ineligible to receive aid, but may pursue participating in the College of Charleston Semester Installment Payment Plan (not available in summer) through the Treasurer’s Office. Students should be prepared with other resources to pay all educational expenses not covered by the payment plan. Students whose appeals are approved may have their eligibility for aid reinstated. Financial aid may be awarded if the student meets routine eligibility criteria, subject to availability of funds. The College of Charleston’s satisfactory academic progress policy for financial aid eligibility complies with the Higher Education Act of 1965, as amended, federal regulations found in Section 668, 690, and applicable DCL GEN 96-10, 96-18, et al.

SAP Appeals Calendar

Summer: Students appealing eligibility for this period must have submitted an appeal by the first weekday in June.

Fall and spring: Students appealing eligibility for the academic year may submit an appeal from the second Monday in May until the last weekday in August. Students who are making up hours from the previous academic year in Maymester and summer sessions are strongly encouraged to appeal for the fall semester after summer grades are posted on Cougar Trail.

Spring: Students appealing for the spring semester only may submit an appeal from the first weekday in January until the last weekday in January.

Return of Title IV Funds Policy

The Return of Title IV Funds Policy (federal student financial aid programs) was implemented at the College of Charleston in fall 2000. Federal regulations require each educational institution to have a written tuition and fees refund policy (see “basic fees and expenses”) and a return of Title IV funds policy to be applied to students who withdraw during a term for which aid has been received. The Return of Title IV Funds Policy applies only if the student completely terminates enrollment (i.e., cancels his/her registration, withdraws, or is dismissed) or stops attending classes before completing more than 60 percent of the enrollment period.

The amount of Title IV aid that a student must repay is determined in accordance with the federal formula for return of Title IV funds as set forth in Section 484B of the Higher Education Act. This law also specifies the order of return of the Title IV funds to the program from which they were awarded.

A repayment may be required when aid has been credited to a student’s account from financial aid funds in excess of the amount of aid the student earned during the term. The amount of Title IV aid earned is determined by multiplying the total Title IV aid (other than federal work study) for which the student is qualified by the percentage of time during the term that the student was enrolled.

If less aid was disbursed than was earned, the student may receive a late disbursement for the difference. If more aid was disbursed than was earned, the amount of Title IV aid that must be returned (i.e., that was unearned) is determined by subtracting the earned amount from the amount actually disbursed.

The responsibility for returning unearned aid is allocated between the College of Charleston (CoC) and the student, according to the portion of disbursed aid that could have been used to cover CoC charges and the portion that could have been disbursed directly to the student once CoC charges were covered. CoC will distribute the unearned aid back to the Title IV programs as specified by law. The student will be billed for the amount the student owes to the Title IV programs and any amount due to CoC resulting from the return of Title IV funds used to cover charges.

Academic Regulations

www.cofc.edu/AcademicAffairs

Students at the College of Charleston undertake a rigorous course of study that demands a significant time commitment to the academic regimen. As a part of their academic responsibility, all students must devote adequate time to their studies. Many support services on campus are devoted to helping students achieve academic success. Information on specific support services may be found in the student support services section of this catalog.

All undergraduate students at the College of Charleston are required to be familiar with and adhere to the following academic policies.

Degree Requirements

Bachelor of Arts and Bachelor of Science Degrees

The trustees and faculty of the College of Charleston are authorized by the charter of the College to confer the bachelor of arts and the bachelor of science
degrees. (See individual schools for a complete list of majors and degrees offered.)

In order to graduate with either a bachelor of arts or bachelor of science degree, the student must meet three types of degree requirements:

1. Liberal arts and sciences general education degree requirements: a core curriculum of 14 to 18 courses designed to introduce the student to the principal areas of intellectual inquiry and to teach the student basic intellectual skills.
2. Major requirements: the courses specified for the student’s major program, which are designed to provide concentrated study in a specialized field.
3. Electives: courses chosen by the student as a means of studying subjects of particular interest.

To be eligible for graduation, the student must have:

1. Satisfied the general education degree requirements by earning credit in the courses specified and/or successfully passing approved placement exams offered in their stead.
2. Earned credit in courses required for the major, with a minimum grade point average (GPA) of 2.0 in all major courses (or for interdepartmental majors such as urban studies, all courses in the area of concentration). Some programs require a GPA greater than a 2.0; see specific major requirements in the “Schools” section of the catalog.
3. Earned a total of 122 semester hours of credit, with a minimum grade point average of 2.0 in all courses taken at the College (i.e., at least twice as many quality points as quality hours).

It is the responsibility of the student to meet the requirements for graduation as listed above.

Courses numbered 100 or below may carry credit, but are not counted as part of the 122-hour minimum needed for the degree nor do they count toward the GPA. No more than eight hours of physical education and health (PEHD) 100-level courses, including dance (THTR), may be counted as part of this minimum.

Senior-Year Residency

The senior year of work for the degree must be completed in residence at the College of Charleston. However, candidates who have earned more than 60 credit hours at the College of Charleston may petition the Office of the Registrar and the chair of the department of their major to complete up to seven of their final 37 hours at another institution. For study abroad, the determination in advance for credit in excess of seven hours to be awarded during the senior year will be made by the College academic department concerned (see “Study Abroad”).

Second Bachelor’s Degree

A student who has previously earned a bachelor’s degree from the College of Charleston and wishes to pursue further undergraduate work may either complete an additional major and have it noted on the permanent record (with date of completion)* or earn a second degree if it is different from the first (i.e., a B.A. if the first degree was a B.S. and vice versa**). This student must apply for re-admission for the second degree, and then:

- Must earn a minimum of 30 additional credit hours (beyond the 122 currently required for degree) in residence at CofC.
- Meet all degree and College graduation requirements for the second degree program in the catalog under which he or she enters, or in a subsequent catalog.
- Meet all prerequisite and course requirements in the major field(s) for the second degree.

A College of Charleston student may earn more than one baccalaureate degree (i.e., B.A., A.B., B.S.) concurrently at the College of Charleston, if he or she meets the following requirements:

- Earns a minimum of 152 credit hours, including a minimum of 62 hours in residence at CofC.
- Meets all degree and College graduation requirements for both degree programs.
- Meets all prerequisite and course requirements in two different major fields.

Students who hold a baccalaureate degree from another institution may earn a second baccalaureate degree at the College of Charleston by meeting the following requirements:

- Complete a minimum of 30 semester hours at the College of Charleston with at least 15 taken in the major field at the 200 level or above.
- Meet all prerequisite and course requirements in the major field and degree requirements for the second baccalaureate degree program.
- Earn a cumulative grade point average of 2.0 or higher in course work completed for the major and second baccalaureate degree programs.

*CofC students completing a major in the same degree program previously awarded will not receive a second diploma. However, the permanent record (transcript) will reflect the additional major. In the case of multiple majors in different degree programs, the student will choose the degree to be earned and posted on the diploma if the student has not satisfied the requirements to be awarded more than one degree as noted above (earned less than 152 semester hours).

**Students earning an A.B. degree will earn that degree in place of the B.A. or B.S. normally earned with the major.

Undergraduate Catalog Requirements

Students with continuous enrollment have the option of fulfilling all the graduation requirements from the Undergraduate Catalog under which they entered the College or all the requirements from any subsequent catalog. Students who withdraw and then return to the College must follow the graduation requirements from the Undergraduate Catalog under which they are re-admitted or any subsequent catalog, provided the student maintains continuous enrollment.

Purpose for the Common Requirements of the College of Charleston’s Undergraduate Curriculum

Graduates of the College of Charleston complete a challenging course of study that will prepare them to function intelligently, responsibly, creatively, and compassionately in a multifaceted, interconnected world. While their work in the major of their choice will give students specialized knowledge and skills in that discipline or profession, the College’s core curriculum will equip each student, regardless of major, with crucial intellectual skills in analysis, research, and communication. Their coursework in the liberal arts and sciences will offer students a broad perspective on the natural world and the human condition, and will encourage them to examine their own lives and make useful contributions to their own time and place. Over the course of their undergraduate careers, all College of Charleston students will develop the following intellectual skills, areas of knowledge, and dispositions:

I. Research and Communication in Multiple Media and Languages, including proficiency in
   - Gathering and using information
   - Effective writing and critical reading
   - Oral and visual communication
   - Foreign language

II. Analytical and Critical Reasoning, including
   - Mathematical and scientific reasoning and analysis
   - Social and cultural analysis
   - Interdisciplinary analysis and creative problem-solving

III. Historical, Cultural, and Intellectual Perspectives, including knowledge of
   - Human history and the natural world
   - Artistic, cultural, and intellectual achievements
   - Human behavior and social interaction
   - Perspectives and contributions of academic disciplines

   Knowledge of international and global contexts
   Experiencing, understanding, and using multiple cultural perspectives

V. Personal and Ethical Perspectives, including experiences that promote
   Self-understanding, curiosity and creativity
   Personal, academic, and professional integrity
   Moral and ethical responsibility; community and global citizenship

VI. Advanced Knowledge and Skills in Major Area of Study, consisting of
   Skills and knowledge of the discipline
   Sequence of coursework that fosters intellectual growth
   Coursework that extends and builds upon knowledge and skills gained from the core curriculum
   The ability to transfer the skills and knowledge of the major into another setting

**Liberal Arts and Sciences General Education Requirements**

Students are urged to pay special attention to both the selection of and scholastic emphasis on the courses within the liberal arts and sciences general education degree requirements. These courses are designed to provide the students with a solid foundation for further study and an essential part of the undergraduate’s education.

The College may administer placement examinations to determine the level at which entering students are prepared to begin their work in a foreign language and mathematics.

For all undergraduate degrees, the total number of semester hours must include the following:

- **English**: complete ENGL 110, Introduction to Academic Writing, a four-semester-hour course in effective writing, critical reading, gathering and using information. (A degree candidate must enroll in ENGL 110 in the first year and each semester after that until the English requirement has been fulfilled.)
- **History**: six semester hours: complete one course in pre-modern history and one course in modern history from the list of approved courses satisfying the history requirement. The two courses do not have to be taken from the same department or in sequence.
- **Natural Science**: eight semester hours: an introductory or higher sequence from one of the following: astronomy, biology, chemistry, geology, or physics, of which two semester hours must be earned in the accompanying laboratories.
- **Mathematics or Logic**: six semester hours in either mathematics or logic. (This requirement may not be met by a combination of coursework in mathematics and logic.)

Foreign Languages, Classical or Modern: (ENGL and HNDI excluded) 0 – 12 semester hours: satisfactory completion of 202 or its equivalent, or demonstration of proficiency at that level. (For foreign language courses that range from 101 – 202, successful completion of a higher-level course prohibits the student from taking a lower-level course in the same language for credit.)

**NOTE**: Native Speakers of Languages Other Than English: No native speaker of a language other than English will be awarded foreign language placement credit for proficiency in his or her first language. However, a student whose native language is not English, who has received formal instruction or can demonstrate a high level of literacy in his or her first language, may be exempted from further language study. Such students may exempt the general education requirement for language study by successfully completing a minimum of 12 semester hours at the College. For waivers, contact the School of Languages, Cultures, and World Affairs.

**Social Science**: six semester hours from one or two of the following: anthropology, communication (selected courses), economics, political science, psychology, or sociology.

**Humanities**: 12 semester hours from the following nine areas with no more than six semester hours in any one of the following areas:

1. British or American literature
2. Any foreign literature
3. Art history (not courses in studio art)
4. Music (not courses in practice or performance of music)
5. Theatre (not courses in practice or performance of theatre)
6. History (excluding the classes used to satisfy the general education history requirement)
7. Philosophy (excluding 215 and 216)
8. Religious studies
9. Communication (selected courses)

(Certain interdisciplinary courses may also be applied to the humanities requirement. For a listing of humanities courses, visit the Web: www.cofc.edu/~advising/humnties.htm.)

**Major Requirements**

By the second semester of the sophomore year, each student must declare a major through the office of the department of that major. Since the major department must advise the student concerning post-sophomore courses, the declaration of major should be accomplished before the student is enrolled as a junior. Failure to do so may result in a delay of graduation.

A major program requires at least 27 semester hours in one department. No major program, including interdepartmental programs, requires more than 54 semester hours in the major area except business administration and accounting due to accreditation requirements. Every department that offers a major requiring more than 36 hours also offers a major of not more than 36 hours for the student’s choice, except those within the School of Business and Economics. Within these minimum and maximum limitations, each department specifies the number of hours in its major program or programs, and in some instances specifies the actual courses required. See specific major requirements in the “Schools” section of the catalog.

At least 15 hours in the major at the 200 level or above must be earned at the College of Charleston.

Students may complete a double major by fulfilling the requirements of two major programs. If both are completed at the time of graduation under one degree, both majors will be listed on the diploma. If the two majors are different degree categories (BS, BA, AB), the student will choose which degree he or she will earn, unless the requirements have been met for two separate degrees (i.e., 152 hours, including all degree requirements). Please see the policy for Second Bachelor’s Degree on the previous page. All majors completed will be recorded on the transcript.

**Concentrations and Minors**

A degree-seeking student may elect to pursue a program of study organized around a particular theme within the major discipline (a concentration) or outside the major discipline (a minor). Either program must include a minimum of 18 hours selected from a formally designated group. At least nine hours in the minor at the 200 level or above must be earned at the College of Charleston. Successful completion of such a program of study requires a grade point average of at least 2.0 in all courses taken which comprise it. Credit may be received for up to two concentrations or minors, and courses used to satisfy the requirements of one may not be applied toward a second. These courses may be selected from a single department or from several, and interdisciplinary courses may be included. Students must formally declare the concentration area or minor with the individual department in order to have the transcript reflect credit for work done in that concentration or minor.

**Application for Graduation and Degree Audit**

Students should formally apply to graduate on Cougar Trail early in the first semester of their senior year. The application deadline is October 1st for fall graduation and February 1st for spring graduation. All students are issued College of Charleston e-mail accounts and are expected to read their e-mail routinely. All official notifications about graduation are e-mailed to this account.
Students can obtain a printed copy of their Degree Audit on Cougar Trail. After printing the Degree Audit, they should review the audit with their major academic advisor and report any discrepancies to the Graduation Coordinator in the Office of the Registrar. This audit will list remaining degree requirements as well as requirements completed and in progress. The audit assumes successful completion of courses in progress. The Degree Audit is dynamic and changes as students revise their course schedules and progress with their academic career.

While academic advisors and the Office of the Registrar continue to assist students with requirements for graduation, students are ultimately responsible for ensuring that they have met all degree requirements for graduation.

Artium Baccalaureatus (A.B.)

For all majors except classics, completion of all required courses in any major, 18 hours in Latin or 18 hours in Ancient Greek, and six hours in courses in classical civilization such as:

- ARTH 220 Greek and Roman Art
- CLAS 101 Greek Civilization
- CLAS 102 Roman Civilization
- CLAS 103 Classical Mythology
- CLAS 104 Introduction to Classical Archaeology
- CLAS 121 Classical Greece travel course
- CLAS 122 Bronze Age Greece (travel course)
- CLAS 221 Field Methods in Classical Archaeology I
- CLAS 222 Field Methods in Classical Archaeology II
- CLAS 242 Images of Women in Classical Antiquity
- CLAS 253 Ancient Epic
- CLAS 254 Tragedy
- CLAS 255 Comedy
- CLAS 256 Satire
- CLAS 270 Romans in Cinema
- CLAS 301 Topics in Ancient Greek Literature
- CLAS 302 Topics in Latin Literature
- CLAS 303 Topics in Classical Civilization
- HIST 230 Ancient Egypt and Mesopotamia
- HIST 231 Ancient Greece
- HIST 232 Ancient Rome
- PHIL 201 History of Ancient Philosophy

NOTES: The registrar as well as the classics department maintains a list of courses that can be used to satisfy this requirement. Classics majors should refer to the School of Languages, Cultures, and World Affairs section of this catalog for A.B. degree requirements.

An AB Degree will replace the BA or BS degree normally earned with a major, unless the student meets the requirements for a second degree. The student must have earned a grade point average of 2.5 or higher in the courses used to satisfy the classical languages and classical civilization requirements. After the student has declared a major within a department, the student must declare the A.B. degree through the office of the Classics Department.

A declaration should be made prior to the student's final semester at the College.

In the Classroom

Attendance

Since class attendance is a crucial part of any course, students are expected to attend all classes and laboratory meetings of each course in which they enroll. During the first week of classes, instructors will announce and distribute their attendance policies, including criteria to be used in determining excused absences. The professor determines whether absences are excused or unexcused, whether make-up work will be permitted, and whether both excused and unexcused absences count in determining the basis for a grade of "WA." If attendance is used for grading purposes, the professor is responsible for keeping accurate attendance records. Each student, whether absent or not, is responsible for all information disseminated in the course. If a student has more than the maximum allowed absences, as defined in the course syllabus, the professor may assign a grade of "WA" for the student. The grade of "WA" is a failing grade. The procedure for assignment of this grade requires that the professor submit the "WA" on Cougar Trail on the Web on or before the last meeting day of the class. The registrar will then send an e-mail notification to the student, if the WA is assigned prior to the end of the semester. The students are responsible for keeping addresses current through the Office of the Registrar and for forwarding all administrative college e-mail communication from their College of Charleston Edisto account.

If students who participate in athletic competitions or other College-sponsored events want to be assured that they are in compliance with the faculty member's attendance policy, they must provide written notification to all course instructors of dates and times when regularly scheduled classes and labs will be missed.

Semester Hours (Credit Hours)

The credit that a student earns by the satisfactory completion of the work in any course is measured in units called semester hours. The semester-hour value of most courses is the same as the number of hours per week that the course meets during the fall or spring semester. However, three hours a week of required laboratory work have a credit value of only one semester hour.

Full-Time Status

Students at the College are considered full time if they are enrolled for 12 or more hours and are paying full tuition. However, it should be noted that an academic schedule of only 12 hours is not sufficient to allow a student to graduate within four calendar years without attending summer school. Full-time attendance in summer school is defined as 12 hours enrollment across the five May and summer terms.

Class Rank

Advancement to sophomore rank requires credit of at least 30 semester hours; to junior rank, 60 semester hours; to senior rank, 90 semester hours. Students are required to declare a major before they advance to junior rank. A minimum of 122 semester hours of credit is required for graduation. (See Second Bachelor's Degree policy.)

Auditing Courses

Permission to audit a regular academic course must be received from the instructor teaching the course on a Permission to Audit Form, available on the registrar's website. This form must be completed and submitted to the registrar no later than the end of the drop/add period. A student may switch from grade to audit status or audit to grade status only within the drop/add period.

An audit will be recorded on a student's permanent record at the College. Faculty may set attendance and/or other requirements for audit students; an audit may be revoked if the student does not comply with these requirements. Full tuition is charged for audited coursework.

NOTE: No audits are permitted in studio courses or independent study-type courses.

The Grading System

The College of Charleston initiated a new grading scale that includes minuses as well as pluses for all undergraduate students in fall 2006. Notification of this upcoming change has appeared in “The Grading System” section of the catalog every year since fall 2002. This change to a new grading scale was approved by the Faculty Senate in 2001 and supported by the Student Government Association.

Grades are available on Cougar Trail on the Web at https://cougartrail.cofc.edu beginning with the date set by the Registrar’s Office for the term specified. For a complete academic record of their grades, students
may request an official academic transcript from the Office of the Registrar or they may view their unofficial transcript on Cougar Trail on the Web.

Students receive letter grades for every course in which they enroll. Each letter grade has a numerical “quality point value” as shown below. The following grading system, with quality values as indicated, was implemented in the fall of 2006.

The grade “I” indicates that only a small part of the semester’s work remains to be done, that the student is otherwise doing satisfactory work in the course, and that an extension of time is warranted to complete the course. The grade of “I” also signifies that an agreement has been established between professor and student as to the quality of work remaining to be done, the deadlines established for its completion, and a schedule of meeting times. It is recommended that this agreement be made in writing with both professor and student having a copy. The student is allowed 60 days from the date of the last scheduled examination day of the semester in which this grade is received to complete the work in the course. If the student does not complete the work within 60 days, the “I” is automatically changed to an “F.” Exceptions must be approved in advance by the faculty member and the director of undergraduate academic services.

The statute of limitations for grade changes is two calendar years from the original grade submission deadline. After this period of time has elapsed, normally no grade issued to a student may be changed. Requests for any change of grade should be initiated by the faculty member who assigned the grade. All requests must be adequately documented.

An “IP” may be assigned for courses that overlap terms. Any bachelor’s essay, independent study, or honors course that, by definition, transcends more than one semester is eligible for an “IP” at the end of the first semester of study. An “IP” should not be assigned to students who have failed to complete coursework within a standard course. “IPs” are not automatically changed to “Fs” after 60 days.

A grade of “P” carries only earned hours; does not carry quality hours or quality points.

A “PT” carries only earned hours; does not carry quality hours or quality points.

A “CP” indicates that a student has completed a program such as international study or cross registration with another institution for which the attempted credit is applied for courses earning a grade of “C” (2.0 on a 4.0 scale) or better. The “PT” is then changed to a “CP.”

A “CP” indicates that a student has completed a program such as international study, cross-registration, or a College of Charleston co-op. The grade status indicator of “CP” carries no quality points, quality hours, or earned hours.

A grade of “S” or “U” may be assigned in certain courses that do not count toward earned hours for graduation.

An “AU” indicates that the student is auditing. Audited coursework carries no quality points, no quality hours, and no earned hours, but carries full fees and tuition. Please see the “Auditing Courses” section of the catalog.

An “NR” indicates that no grade has been reported because the student has just registered for a future semester or the coursework is actually in progress.

A missing (or blank) grade may also indicate that no grade was reported by the instructor by the grades due deadline for a specific term. Missing grades are converted to “Fs” at the end of 60 days if the instructor does not turn in a grade change form indicating the correct earned grade.

The grade of “XF” is intended to indicate that a student failed a course for academic dishonesty. For serious and intentional violations of the Honor Code, the faculty member for the course involved will be instructed by the Honor Board to assign the grade of “XF.” The grade “XF” shall be recorded on the student’s transcript with the notation "failure due to academic dishonesty." A student may petition the Honor Board for removal of the “XF” after two years. The implementation of the “XF” grade strengthens the College’s commitment to academic integrity.

Final Examinations

Examinations must be taken at the time scheduled (refer to the appropriate copy of “course information” or go to the Web at www.cofc.edu/~register/course-Calendar.htm) except when:

1. Two or more exams are scheduled simultaneously.
2. The student has three or more examinations within a 24-hour period.

Note: Forms for permission to reschedule one exam may be obtained from the Office of the Registrar with written permission of the instructor and must be obtained prior to the first day of the exam period.

If a student is absent from a final examination, the temporary mark of “X” may be assigned electronically by the instructor and the “X” will immediately translate to an “F” that will remain until the faculty member initiates a change of grade and forwards to the Registrar’s Office within the 60-day period designated for missing and incomplete grades. After the 60-day deadline, the change of grade request should be sent to the Office of Undergraduate Academic Services. The Associate Dean of Students will grant an excused absence if the student has a documented illness on the day of the examination or if documentable extenuating circumstances prevented the student’s presence at the examination. An excused absence entitles the student to a make-up examination, which will be held as soon as possible. Any student who has not been granted an excused absence will fail the course and will be able to obtain credit only by repeating the course and earning a passing grade.

NOTE: Re-examinations are not allowed.

Pass-Fail Option

The pass-fail option is provided to encourage students to enrich their educational experience and to venture outside their major areas of concentration or competence. To earn a pass under the pass-fail option, students must perform at the “C (2.0)” level or above. A grade of “P” carries only earned hours; does not carry quality hours or quality points. A grade of “NP” will be recorded on the transcript, but will carry no grade points and will not be used in calculating the GPA.
The following restrictions apply:

A student electing the pass-fail option must be in good standing (not on academic probation) and must be of sophomore standing or above.

A student electing the pass-fail option must do so at registration by completing a pass-fail option petition (available at the Office of the Registrar), and no change may be made after the drop-add period.

No more than 12 credit hours may be taken under the pass-fail option, and no more than one course in any one semester.

No course taken on the pass-fail option may be used to satisfy the general education requirements or be taken in one’s major or minor fields. If a student who completes a course under the pass-fail option later changes his/her major and that course is required for the major, he/she may petition the department for the course to be accepted.

No course may be repeated on a pass-fail option. A course for which the grade “P” has been received may not be repeated.

Withdrawal from Courses

Students may voluntarily withdraw from individual courses and/or labs until the official withdrawal deadline for the semester (see “academic calendar”) through Cougar Trail on the Web, or by submitting the required paperwork to the Registrar’s Office. A grade of “W” will be entered on their record unless the student has been found responsible for an Honor Code violation. In that case, the professor determines the grade entered on the student’s record for that class. Students wishing to drop or withdraw from Express II courses after the deadlines for full-semester courses must fill out a request in the Registrar’s Office by the official withdrawal deadline for the course.

Withdrawal from Courses

Students may petition for withdrawal after the official deadline through the Office of Undergraduate Academic Services. This permission will be granted only if continued enrollment in the course would be detrimental to the student’s health or if documented extenuating circumstances prevent the student’s continued enrollment.

If a student discontinues enrollment from the College of Charleston, whether voluntarily or not, re-entry for future semesters may be contingent on satisfying conditions outlined by the Offices of Student Affairs and Undergraduate Academic Services. NOTE: A decision not to attend a course does not constitute a withdrawal from it. Failure to properly withdraw from or drop a course can result in financial responsibility for full tuition for the course as well as a resulting grade of “F.”

Course Repetition Policy

It is the policy of the College of Charleston that students may repeat up to 12 hours of passed coursework excluding:

- Prerequisite courses for passed courses (Repeat Exclude)
- Courses which have catalog restrictions due to duplication of subject material (Repeat Exclude)

There are two types of transcript coding for repeated courses:

- Repeat Include (RI) — Grade will be calculated into total GPA (not averaged with prior grade), but student will not receive earned hours for this course.
- Repeat Exclude (RX) — Grade will not be calculated into GPA nor will earned hours, quality hours, or quality points be awarded.

A passed course may be repeated only once, regardless of the outcome. A subsequent registration will result in a drop. Repetition of passed courses will not increase earned hours, but students will receive quality hours and quality points in order to calculate the grade of the repeated course into the overall GPA. Repeated course grade points will not be used to calculate honors at graduation.

Students may repeat any course they have previously failed. The grade for the repeated course, as well as the failing grade, will be computed into the student’s cumulative GPA and recorded on the student’s transcript. Any student who does not want the grade for a repeated, previously passed course calculated must complete a form available in the Office of the Registrar before the drop-add deadline.

Scholarship students (academic and athletic), financial aid students, and veterans may repeat courses under this policy; however, they should check with the Departments of Financial Aid or Athletics to see how this will affect their eligibility.

Transfer Credit or Placement Credit That Repeats CoFC Courses

Students who are given transfer or placement credit need to pay particular attention to the College’s course equivalents awarded, and be careful not to register for a course that is considered a repeat or a duplicate of the credited coursework (i.e., taking the same course twice results in only one granting of credit, not two). Students may petition the Registrar’s Office, with approval of their advisor, to decline placement, AP, or transfer credit. Such petitions must be made before the course is repeated.

General Repeat Rules:

- Prerequisite Rule: A student may not take a course that is a prerequisite for a course that he/she has already passed and received credit for the second course.
- Upper-Level Coursework: A student in some cases may not take lower-level coursework for credit after completing similar upper-level coursework. Students must check the individual course descriptions and/or departments for restrictions. (Example: MGMT 105 may not be taken after satisfactory completion of an upper-level MGMT course.)
- Cross-Listed Courses: A student may not take cross-listed courses and receive credit for both courses.
- Special Topics Courses: A student in some cases may have limitations on the credits repeatable in specific special topics courses. See individual department listings and course descriptions for further information.
- Honors and Regular Courses: A student may not take both an Honors course and the regular course equivalent and receive credit for both.

Please consult your personal degree audit, the specific course descriptions in this catalog, and your advisor for additional information.

Some additional limitations include, but are not limited to:

Physical Education/Theatre activities courses (e.g., yoga, dance, etc.)

- Courses in basic physical education activity theory (100 level) may be taken for elective credit by any student, but no more than eight semester hours total (including THTR/PEHD cross-listed dance/activity courses) may be applied toward a degree. More than eight hours will be coded as RI (up to the maximum allowable RI hours) whether or not the student has previously taken that exact course. Subsequent registrations will be dropped.

Languages

- Having completed any 101 or 102 language course (i.e., SPAN, GRMN, FREN, or LATN), students may not take 150 for credit; conversely, students who complete 150 may not receive credit for 101 or 102. The same rule applies for the 201/202/250 sequence.
- Having completed SPAN/FREN 313 or 314, students may not take SPAN/FREN 350 for credit; conversely, students who complete SPAN/FREN 350 may not receive credit for either 313 or 314.

Mathematics

- Students who have completed MATH 105, 111, or 120 may not subsequently receive credit towards graduation for MATH 101 or 102.
• Students who have completed MATH 120 may not subsequently receive credit for MATH 105 or MATH 111.

Business, Economics, Business Law, Accounting, International Business
• Students who have completed ECON 200 or 201 may not subsequently receive credit for ECON 101.
• Students with majors outside of the School of Business and Economics may receive a maximum of 30 business school credit hours.
• Students who have completed, or are currently enrolled in, BIOL 205 or 306 may not subsequently receive credit for MGMT 105.

Business school majors who have completed, or are concurrently enrolled in, a 300- or 400-level business, international business, economics, or accounting course may not receive credit for MGMT 105.

Art History and Music
• Only six hours from ARTH 290 and/or ARTH 340 (Selected Topics) may be applied towards the 36 hours for the art history major (majors only).
• Students may only receive up to 12 credit hours for MUSIC 399.
• Students may only receive up to 8 credit hours for MUSC 161/292–298, MUSP 3xx, MUSP 4xx.

Sciences and Psychology
• Students who have completed CHEM 111 or 112 will not subsequently receive credit for both BIOL 101 and BIOL 111 or for both BIOL 102 and BIOL 112, or for both BIOL 111 and 112 and Honors Biology.
• Students will not receive credit for both PHYS 105 and PHYS 456.
• Students will not receive credit for both GEOL 101 and GEOL 103.
• No more than 6 credit hours of Psychology Independent Study (PSYC 400–403) or Psychology Special Topics (PSYC 410) may be applied toward the major requirements.

Philosophy
• PHIL 240 may not be taken for credit if credit has been received for JWST 240.
• PHIL 255 may not be taken for credit if credit has been received for RELS 255.

NOTE: This is not a complete list of specific situations resulting in repeated or duplicate coursework. Please consult your personal degree audit, the specific course information in this catalog, and your advisor for additional information.

Course Overload
The normal course load for degree candidates in fall and spring semesters is 14–17 credit hours. Enrollment in courses totaling more than 18 credit hours requires special permission from the student’s academic advisor and the department chair. This permission must be obtained before registration for the semester in which the overload is to be carried. Failure to obtain permission may result in cancellation of any courses not specifically authorized over 18 hours.

Course Overload During Summer
Students may take only one course during Maymester. Students are advised to take no more than two courses concurrently during any of the other summer terms. Taking more than two courses concurrently is considered an overload. Students with a cumulative GPA of 3.0 or less are advised against taking an overload. Students with a cumulative or major GPA of 2.0 or less are strongly advised against taking an overload.

Grade Point Average (GPA)
The number of quality points earned for each course is calculated by multiplying the semester-hour value of the course by the number of quality points assigned to the grade received for the course. For example, a grade of “B” received in a three-semester-hour course would earn 9.0 quality points (3.0 quality points x 3 semester hours).

At the end of each semester, the student’s GPA for the semester is calculated. To compute the semester GPA, the total number of quality points earned for the semester is divided by the total number of quality hours carried. For instance, a student who earns 36 quality points while carrying a course load of 15 semester hours would earn a GPA of 2.40 for the semester.

The student’s cumulative GPA is also computed at the end of each semester. This is the grade point average the student has earned up to that point at the College. The cumulative GPA is computed by dividing the total quality points the student has earned at the College by the total number of quality hours carried. For example, a student who has earned a total of 180 quality points over 90 semester hours would have a cumulative GPA of 2.0.

For information on the S.C. LIFE Scholarship GPA calculation, visit www.cofc.edu/finaid. Individual student GPA calculations for the LIFE Scholarship can be found on Cougar Trail on the Web, accessed by student log-in. The LIFE Scholarship GPA is not to be confused with the College of Charleston GPA maintained on the degree audit and on the academic transcript. Students may access the College GPA calculator online at www.cofc.edu/%7Eundgrad/GPA.html.

Faculty Honors List
After the end of each semester, the Office of the Registrar releases the faculty honors list. Students are named to this list who were enrolled in and completed at least 14 semester hours and who earned a GPA of 3.80 (highly distinguished) or 3.60 (distinguished). In neither case may there be an “I” (Incomplete) or a grade lower than “C.”

Dean’s List
The honor of inclusion on the College of Charleston’s Dean’s List is awarded to students who have earned highly distinguished faculty honors for both the fall and spring semesters of the academic year. Students who enter the College in the second semester are consequently ineligible for the yearly class honors for that academic year.

Graduation with Honors
Students who earn a cumulative grade point average of 3.900 to 4.000 will graduate summa cum laude. Students who earn a cumulative grade point average of 3.750 to 3.899 will graduate magna cum laude. Students who earn a cumulative grade point average of 3.500 to 3.749 will graduate cum laude.

To be eligible for graduation with honors, at least 62 quality hours of the coursework to be applied to the degree must have been completed at the College of Charleston. Note that a course graded with a “P” carries no quality hours. For the purpose of calculating the GPA for graduation with honors, all coursework taken at the College of Charleston will be included in that calculation.

Departmental Honors
Designed for mature individuals who are capable of sustained and independent work, the program of departmental honors is designed to give upper-classmen of exceptional ability an opportunity to explore intensively a field of their particular interest. Students take the initiative in outlining their proposed research, experiment, or special study; in enlisting the support of a faculty advisor; and in securing the approval of the department. At the conclusion of the program, departmental honors can be awarded only with the approval of the department. To be eligible, students must have earned a grade point average in the major of at least 3.5 and completed a minimum of 12 semester hours of exceptionally fine work in any combination of seminar, independent study, tutorial, and bachelor’s essay. Whichever format is chosen, the project should develop the student’s proficiency in library research or laboratory methodology, and the
finished composition should be distinguished by its organization, reasoning, and expression.

The recommended capstone for earning departmental honors is the bachelor's essay. Students must seek one of the professors in their major department to supervise the undertaking and must submit in writing a proposal for the project. Once the plan is accepted, students must work closely with their advisor. Since researching and writing the essay extends over both semesters of the senior year, students should submit one or more preliminary drafts for critical examination in order to allow time for proper revision of the essay. The department may also prescribe additional requirements for ensuring the quality of the work. Satisfactory completion of the bachelor's essay entitles the candidate to six semester hours of credit. Bachelor's essays are catalogued and retained in the collection of the College library.

**College Graduation Awards**

High scholarship and exceptional achievement in extracurricular activities are traditionally important at the College. Prizes that recognize such achievements are also a part of the College tradition. Announcements of the recipients of cups, medals, and other awards are made each year at the awards ceremonies, part of commencement week activities.

**Transcripts**

Students may obtain the unofficial transcripts of their academic record free of charge via Cougar Trail on the Web. Official transcripts may be obtained when the student completes and signs a request form in the Office of the Registrar or by printing and filling out the Transcript Request Form found online at [www.cofc.edu/~register/TranscriptRequest.pdf](http://www.cofc.edu/~register/TranscriptRequest.pdf), which can then be printed and faxed or mailed to the Registrar’s Office. An official transcript may also be requested on Cougar Trail and processed post-submission of the Transcript Signature Release Form. Official transcripts incur an $8.00 per copy fee with additional charges for faxing or Fed-Ex. A student's record may be released by the registrar only upon the specific signed request of the student. This request must be made in writing at least two weeks before the date the transcript is needed. Transcripts will not be issued for any student who has overdue financial obligations to the College of Charleston.

**Degree and Enrollment Certifications**

Students may obtain certification of enrollment (or proof of full-time enrollment) for insurance, scholarship, and loan purposes by logging onto Cougar Trail on the Web and selecting “Enrollment Verification” from the menu. Follow the prompts provided by National Student Clearinghouse. Enrollment Verifications are available immediately following the drop-add deadline for spring and fall terms. Questions should be directed to the Office of the Registrar.

**Transfer Credit for Work at Another Institution and for Study Abroad: Transient Student Status**

**Courses Taken Elsewhere**

A degree candidate at the College of Charleston who wishes to receive College of Charleston credit for courses at another institution must submit the Coursework Elsewhere form available on the Office of the Registrar's website: [http://www.cofc.edu/~register/forms.htm](http://www.cofc.edu/~register/forms.htm). The senior year of work for the degree must be completed in residence at the College of Charleston. However, candidates who have earned more than 60 credit hours at the College of Charleston may petition to complete up to 7 of their final 37 hours at another institution (Senior Petition form).

Coursework completed at other institutions must have a minimum grade of “C” (2.0 on a 4.0 scale) or its equivalent. Credits awarded at another institution as a result of placement testing are not acceptable. Courses graded on a pass/fail basis are acceptable only if the institution where the courses were completed will assign a minimum equivalent of “C” (2.0 on a 4.0 scale) to the “pass” grade.

The institution the student wishes to attend must be regionally accredited. College of Charleston credit will be granted for the courses taken only if those courses are ones receiving credit toward graduation in the other college or university conducting the instruction. In order to ensure that the courses will be accepted at the College of Charleston for transfer credit, they must be approved in the Registrar’s Office before actual enrollment. Acceptance of credit for an approved course will become final only when the Registrar of the College of Charleston receives an official transcript of the student’s record from the accredited institution where the course was taken. Duplicate courses (repeats) will not transfer. Credits will be awarded based upon actual credits earned, with grades of “C” (2.0 on a 4.0 scale) or better. Grades do not transfer, only credits. The maximum number of transfer credits acceptable toward a College of Charleston degree is 92 semester hours total from all institutions; 60 semester hours are the maximum from a two-year program or institution. Students may decline transfer credit prior to enrolling at the College of Charleston in order to add another course that did not transfer due to the maximum number of transfer credit allowed policies. Students may not decline transfer credit after enrolling at the College of Charleston in order to take a course at another institution as a transient or cross-registered student.

Official permission to take coursework elsewhere is reflected via Cougar Trail through the Transfer Credit link. If you are required to submit proof of permission (transient permission) in order to register at another institution as a transient student, submit the transient permission form ([www.cofc.edu/~registerFORMS_students.htm](http://www.cofc.edu/~registerFORMS_students.htm)) and attach a printed copy of your approved transfer credit on Cougar Trail. If a transient institution also requires proof of your academic standing and your eligibility to return to the College of Charleston, you may submit your College of Charleston transcript to verify this request.

**Study Abroad**

For study abroad, the International Student Exchange Program, and the National Student Exchange Program, students must apply through the Center for International Education (CIE). The determination in advance that credit may be awarded will be made by the Director of CIE and in consultation with the academic department concerned when courses are not listed in the course inventory. The Coursework Equivalency form is available from the Center for International Education for this purpose. Once the transcript is received, on completion of the work, the Registrar’s Office verifies and enters the credits as noted above.

Students with more than 87 earned hours at the time they study abroad must seek approval from the Center for International Education and the chair of the major department if more than 7 of the last 37 hours are taken away from the College.

**Minimum Scholastic Attainment and Probation**

Students are placed on academic probation when the level of their academic work is endangering their opportunity to earn a degree from the College and their continuation at the College is in jeopardy. The conditions of probation are intended to provide for counseling and enrollment in Learning Strategies at a sufficiently early date for assistance to be effective; to give students who are experiencing difficulties further opportunity to demonstrate adequate performance; and to provide assistance to students who have had significant problems interfering with their ability to study.

Students enrolled at the College of Charleston must earn a minimum grade point average (GPA) to avoid being placed on academic probation. These requirements are on a sliding scale based upon the total credits earned by the student. For more information, see [www.cofc.edu/~undrgrad/probation.html](http://www.cofc.edu/~undrgrad/probation.html).
Probation

If a student’s cumulative GPA at the end of any semester is less than the grade point average required as listed above, the student is placed on academic probation.

1. Once placed on probation at the end of a fall or spring term, a student must show satisfactory academic improvement by the end of the next major semester (excluding Maymester and summer sessions), regardless of the number of hours earned or attempted, or the student will be subject to dismissal. Generally, satisfactory academic improvement is defined as continuous, significant improvement in GPA earned at the end of each semester during the probationary period (15 credit hours excluding EDLS 100). The improvement must be great enough so that the student makes progress toward achieving academic good standing. The decision regarding satisfactory academic improvement will be made by the director of Undergraduate Academic Services.

2. The student must make up the GPA deficiency in the next 15 credit hours attempted. Depending on the student’s circumstances, it may be advisable to take fewer than 15 credits in the next fall or spring term.

3. The student is required to enroll in and successfully complete EDLS 100: Learning Strategies during the next fall or spring semester if the student has not already successfully completed the course. EDLS 100 is not counted toward the 15 credits above.

4. If, at the end of the fall or spring semester during or after which the 15th credit hour is completed, the student’s cumulative GPA is not at or above the grade point average required, the student will be subject to dismissal for academic deficiency.

5. Students on probation may receive transfer credit for courses at another institution but are not normally eligible for cross registration or leave privileges. Students who are dismissed from the College for academic deficiency are not eligible for financial aid or for transfer credits during the period of suspension. The period of suspension for a first dismissal is two semesters, of which the entire summer may count as one. The period of suspension for subsequent dismissals is three full calendar years.

6. Students who are readmitted after any period of suspension may be evaluated for financial aid eligibility upon completion of 12 hours with a 2.0 or better GPA.

7. Visiting students to the College of Charleston for summer sessions must adhere to the same academic standards as College of Charleston degree-seeking students. Students who have previously earned less than a 2.0 GPA while attending the College or who are not in good standing at their home institutions will normally not be permitted to enroll for summer sessions. However, instances where these students have gone on to demonstrate a proven academic record at other universities or who have been granted permission to complete courses as part of their degree programs at other universities may petition the Office of Maymester/Summer Sessions along with the Office of Undergraduate Academic Services for permission to enroll. Petitions will be handled on a case-by-case basis. A student granted permission to enroll in a summer session is not guaranteed admission or readmission during a subsequent semester.

Withdrawal from the College

Students may decide to withdraw from the College for a variety of reasons. In order to protect the integrity of the transcript and ensure that the record on file at the College is accurate, any student who is considering withdrawing should visit the Office of Undergraduate Academic Services to officially withdraw rather than merely drop out. An accurate student record will be maintained. Undergraduate Academic Services will notify the appropriate academic department(s) about the withdrawal.

Students must withdraw from all courses during the official withdrawal periods. Normally, a student who is granted a leave of absence is not allowed to register for summer sessions. However, instances where these students have gone on to demonstrate a proven academic record at other universities or who have been granted permission to complete courses as part of their degree programs at other universities may petition the Office of Undergraduate Academic Services for permission to enroll. Petitions will be handled on a case-by-case basis. A student granted permission to enroll in a summer session is not guaranteed admission or readmission during a subsequent semester.

Leave of Absence

All requests for leaves of absence must be addressed to the director of Undergraduate Academic Services. Students participating in exchange programs with other universities may have leave status approved through the Office of International Education and Programs. When official leave is granted, students need not apply for readmission. However, students should notify the Office of the Registrar at the time of registration that they are returning from leave.

A written request for leaves for periods of time up to one year are normally granted prior to the “W” date in the semester. For students having a GPA of 2.0 or better, a written request filed with Office of Undergraduate Academic Services will normally be approved. For students having a GPA less than 2.0, a request should be addressed to the Office of Undergraduate Academic Services for possible approval. This request should be in writing and should explain the circumstances. Appropriate documentation should accompany the request. If a leave of absence is not approved, the student will be withdrawn from the College.

Leaves requests presented after the “W” date should be addressed to the Office of Undergraduate Academic Services for possible approval. These requests should be in writing and should explain the circumstances. Appropriate documentation should accompany the request. It may be necessary to follow procedures for late withdrawal from courses (see “Withdrawal from Courses” procedure).

NOTE: If a leave of absence is not taken, a student will have to reapply through the Office of Admissions, be charged another admission and new student fee, and the student will also have to reapply through academic orientation upon returning to the College.

Readmission

Any student at the College of Charleston who voluntarily withdraws from the College or is dismissed for any reason must apply for readmission in order to re-enroll. If a student discontinues enrollment from the College of Charleston, whether voluntarily or not, re-entry for future semesters may be contingent on satisfying conditions outlined by the Offices of Students Affairs and Undergraduate Academic Services. The College does not admit students who are ineligible to return to the last college or university attended.

This rule applies to all students, including those applying for readmission. All students who have done previous work at other colleges or universities must have their transcripts sent to the Office of Admissions. All applicants must meet transfer GPA requirements.
and all admission deadlines. In making decisions on those applying for readmission, the following guidelines will be used:

1. Students who voluntarily withdraw from the College while in good standing and with a cumulative GPA of 2.0 or above will be approved for readmission.

2. Students who have been dismissed from the College for academic deficiency or separated for disciplinary reasons and who complete the suspension period will be considered for readmission. Because the simple passage of time cannot ensure that dismissed students will improve their academic record or complete sanctions granted to them, applicants for readmission must submit with their applications for readmission, a personal letter addressed to the Office of Undergraduate Academic Services outlining how they have used their time while out of school and giving their reasons for believing that they will now be successful at the College. Those students whose records at the College of Charleston indicate that successful completion of a College of Charleston degree in a reasonable length of time is impossible or extremely improbable will not be accepted. They will be advised accordingly and urged to seek alternative plans. Those whose records indicate that they can reach graduation standards in a reasonable period of time and those that have met the conditions required for reconsideration must meet the following conditions for readmission:

   a. They must complete a special one-day workshop that contains information on the services that the College provides for students with academic difficulties, the academic requirements they must satisfy, and their personal responsibilities in reaching good academic standing. Most students will be required to enroll in the course, Learning Strategies (EDLS 100), to attain the skills necessary to succeed at college.

   b. Each student must sign a readmission contract prepared by the Office of Undergraduate Academic Services. The contract specifies the grade point average (GPA) and other specific requirements that readmitted students must meet in order to remain at the College of Charleston.

   Grades for readmitted students on contract are reviewed every semester or until students bring their GPAs into compliance with the College’s standard minimum scholastic attainment. In effect, readmitted students on contracts are placed on probation when returning and are subject to immediate dismissal if they do not meet the conditions of their contracts.

3. Students who voluntarily leave the College while on probation may be readmitted but under conditions in 2 (a, b) above.

4. Students who voluntarily leave the College and who are not on probation, but who have less than a 2.0 cumulative GPA, may be readmitted conditionally in accordance with 2 (a, b) above.

5. Students who previously attended the College as provisional students but failed to meet the conditions of the program must satisfactorily complete a minimum of 30 semester hours at another institution before applying for readmission. They will be considered for admission only if they meet the admission standards applied to transfer students and then will be considered under 2 (a, b) above.

6. College of Charleston or transfer credits earned ten or more years prior to re-enrollment at the College may be evaluated and revalidated by academic departments to be applicable for graduation credit. This is due to changing graduation requirements or professional certification requirements.

   NOTE: See Three-Year Option.

**Readmission of Students Dismissed for Academic Deficiency**

Students who have been dismissed once for academic deficiency may apply for readmission only after the lapse of two semesters (for this purpose, the 10-week summer session is considered one semester). Students who have been dismissed twice for academic deficiency may apply for readmission only after the lapse of three calendar years from the second dismissal.

Additional information and letters of recommendation may be required from some applicants.

Those applicants who are conditionally readmitted to the College will be required to attend a full-day workshop before re-enrollment to make sure that they understand the retention and graduation standards they will be required to meet. The workshop will include academic advising and registration in classes. Failure to attend this workshop will mean a student must either defer their return until the next fall or spring semester or apply for readmission for a future fall or spring semester.

Credits earned at another institution during a student’s dismissal period will not be accepted toward a degree at the College of Charleston.

**Three-Year Option for Readmits (Academic Forgiveness Policy)**

Students readmitted to the College after an absence of three or more years may choose to have their previous College of Charleston record treated as transfer credit if they achieve a GPA of 2.50 or better upon completion of 15 semester hours earned after their return. Previous work at the College will remain on the students’ permanent records; however, only coursework completed since readmission will be used to calculate their cumulative GPA. Students choosing this option must request it in writing to the Office of Undergraduate Academic Services once the 15 semester hours are completed.

   NOTE: Students who choose to apply the three-year option to their record should be aware that any coursework done prior to readmission in which a grade of “C-” or lower was earned will not count toward graduation. For the purpose of calculating GPA for graduation with honors, all coursework taken at the College of Charleston will be included in that calculation.

**Students’ Responsibilities and Rights**

In meeting the standards for admission to the College of Charleston and choosing to enroll, students are subject to all college regulations. The academic and non-academic policies outlined by the College are intended to promote honorable citizenship that encourages a thriving living and learning environment sensitive to the rights of others and the achievement of knowledge. Our expectations neither advocate the surrender of basic constitutional rights nor dilute those rights, but strengthen and complement the rights of each individual enrolled.

By enrolling at the College of Charleston, students accept the responsibility to adhere to its regulations and codes. It is in the spirit of good citizenship and community stewardship that specific rights and responsibilities are detailed in the Student Handbook: A Guide to Honorable Conduct. The handbook is available at www.cofc.edu/studentaffairs/general_info/studenthandbook.html. It is the responsibility of all students to become familiar with the academic and conduct regulations that govern eligibility to continue at the College. Examples include:

- Academic Integrity and the Honor Code
- Student Code of Conduct
- Classroom Code of Conduct
- Alcohol and Substance Abuse Policy
- Drug-Free Schools and Communities Act
- College of Charleston English Fluency Policy
- Student Grievance Procedure

**Family Educational Rights and Privacy Act**

The Family Educational Rights and Privacy Act of 1974 (FERPA), as amended, is a federal law that protects the privacy of student education records. In accordance with regulations issued under FERPA, the College of Charleston provides an annual notification
to our enrolled students of their rights (to: inspect, review, and amend the student's education record; consent to disclosures of personally identifiable information contained in the student's education record; opt-out from the release of information designated as directory information by the College; and file a complaint with the US Department of Education) under FERPA; as well as an explanation of the exceptions under FERPA that allows the College to disclose information from the student's education record without consent.

A First-Year Seminar (FYSM) focuses on topics within or across academic disciplines of study. First-Year Seminars are small courses (generally between 20-25 students) taught by roster faculty members. A Learning Community links two or more courses, often around an interdisciplinary theme or problem. Students participating in Learning Communities are enrolled in at least two classes together in addition to a weekly Synthesis Seminar. The Synthesis Seminar includes an hour of discussion and reflection led by a Peer Facilitator who is an upper-level student at the College. Social events and class trips allow FYE students to get to know faculty and peers outside of the classroom.

Postgraduate Fellowships
843-953-5084
www.cofc.edu/~pstudies

The Office of Postgraduate Fellowships works with students who possess the following qualities to prepare them as candidates for prestigious national and international fellowships:

- Good grades: a GPA of 3.7 and above is recommended.
- The ability to write clearly and with style.
- Demonstrated success beyond the classroom, in the form of research, community activism, leadership roles in campus organizations, or internships.
- Academic interests beyond those of a single major. These can be demonstrated by a serious minor or a double major.

Fellowships such as the Fulbright, Gates, Marshall, Mitchell, Rhodes, Rotary and Truman provide opportunities that enable deserving students to explore academic interests and pursue dreams after graduation. These grants can enable one to travel, do research, study at a foreign university, attend graduate school or pursue an internship. Some fellowships are highly specialized and can only be used for research in a specific country, for study at a specific school, or in a well-defined area of academic interest. Others are very broad, and are available to applicants with imaginative proposals. The fellowships office assists qualified students to find the fellowships that best fit their interests.

Undergraduate Research
843-953-6735
www.cofc.edu/ur/

The Undergraduate Research and Creative Activities Program supports faculty-mentored undergraduate projects in all academic disciplines. This includes any creative effort undertaken by the undergraduate student that advances the knowledge of the student in an academic discipline and leads to new scholarly insights or the creation of new works that add to the wealth of the discipline. The program offers several major grants for which faculty mentor and student jointly apply, as well as smaller grants that support travel to conferences or performances where students present their work.
The Honors College

John H. Newell, Dean
843-953-7154
www.cofc.edu/~honors

The Honors College at the College of Charleston challenges bright, motivated students to make the most of the opportunities available to them and to become actively involved in their own education. In Honors classes, students take responsibility for their own learning through class discussions, through interaction with other students and professors, and through independent research. The Honors College is dedicated to providing talented students with a place where they can flourish and grow, a true learning community of teachers and students.

Honors classes are smaller, thereby allowing for more intensive student participation. They are designed to meet the needs of superior students, and many of them are team taught and interdisciplinary so that the student's education transcends the boundaries of traditional academic disciplines. The Honors College gives unusually able students the opportunity to:

- Take special courses designed for students of high ability.
- Engage in independent projects and research.
- Confront greater intellectual challenges and stimulation.
- Receive individualized instruction through a tutorial system.
- Participate in a peer community of students with similar abilities and motivation.
- Live in Honors residence halls with other Honors students.
- Participate in more intensive intellectual discussion and debate.
- Complete scholarly off-campus projects which may include study abroad, internships, or special research projects.

Admission and Retention in the Honors College

The Honors College has special procedures for admission and its own retention requirements. Interested students must apply to and be accepted by both the College of Charleston and the Honors College.

For a brochure containing more detailed information and for all necessary application materials, contact the dean of the Honors College or the Office of Admissions or visit the Honors College website: www.cofc.edu/~honors.

NOTE: Where space is available, students who are not in the Honors College may take Honors College courses with the permission of the instructor and the Honors College Dean.

The Honors Colloquium

Honors colloquia are small, seminar-style classes which emphasize student participation and discussion. They may be more intensive, meet more frequently, and carry more academic credit than courses in the regular curriculum. Honors colloquia are broad in scope and transcend traditional disciplinary boundaries. Frequently, they are team taught by professors from different academic departments.

The Tutorial System

An important part of the Honors College is the tutorial system, modeled after the program of instruction at Oxford, Cambridge, Harvard, and other major universities. Each academic department has courses entitled “Tutorial,” “Independent Study,” and “Bachelor’s Essay.” These are designed to supplement regular course offerings and to respond to the particular interests, needs, and goals of each student. Together with their tutors, Honors College students design their own individual courses of study, determine reading and written assignments, and plan independent projects. Students in the Honors College enroll in a tutorial or independent study, usually in the junior year, and a bachelor's essay, usually in the senior year, either in the department of their choice or in the Honors College.

Honors Center and Housing

The Honors Center, located in one of the historic buildings in the heart of the campus, houses a seminar-style classroom, student computers, and a study/meeting area. It serves as the focal point for the social and intellectual activities of the Honors College. Honors students may also choose to live in Honors housing with other Honors students. The Honors residence halls, Rutledge-Rivers and Buist-Rivers, have Honors residence assistants, hold lectures and seminars in the evenings, and host Honors social activities. In these residence halls, Honors students live in the center of campus, in close proximity to the Honors Center, to the library, and to upperclass Honors students. The Honors Center and residence halls together facilitate a sense of community among Honors College students and faculty.

Requirements for Becoming an Honors College Graduate

Every student in the Honors College must complete all college-wide graduation requirements, including the requirements for a major. A student becomes an Honors College graduate by fulfilling the following requirements:

1. HONS 105 and HONS 106 (Honors English)
2. HONS 120 and HONS 130 (Honors Colloquium in Western Civilization)
3. MATH 120 (Introductory Calculus)
4. An additional mathematics course at or above the 200 level
5. Three additional Honors College courses, one of which must be interdisciplinary
6. Three credits in tutorials and/or independent study
7. A six-credit bachelor's essay (499)
8. A cumulative grade point average of 3.40 or higher

Some of the above requirements may be satisfied through AP and/or IB exams.

NOTE: Honors College graduates will be so designated on their transcripts and will receive special recognition during the awards and graduation ceremonies. Many students in the Honors College also qualify for departmental honors.

The major in art history offers diverse educational experiences in the history of art and culture of Western civilizations, as well as those of Asia and the Americas. A program in historic preservation and community planning is available for students interested in architecture and urban design.

The department strongly supports study abroad programs that enable students to experience firsthand the art, architecture, and urban environments they have studied.

Through a sequence of self-selected courses, students learn to do research, work in two studio art areas (such as drawing, photography, etc.), and express their ideas in oral as well as written presentations — all skills required for any future career.

Our graduates have completed advanced degrees in art history and historic preservation, secured positions in major museums and found fulfilling careers in a variety of areas, such as gallery curatorships, teaching, law and architecture, among others.

The goal of the major in Historic Preservation and Community Planning is to introduce the student to the history, theory, and practice of historic preserv-
tion, and to the necessity of linking preservation with parallel issues in community planning. It is no longer adequate to consider the preservation of particular buildings or landscapes without the larger vision of the surrounding context of the object.

The historic preservation major is firmly located within the liberal arts tradition at the College. It is not intended to be “training” for the technical field of historic preservation, but rather as an introduction to the broader issues which are presently being grappled with by preservationists.

The intention of the program is to awaken in the student an appreciation for the complexity of the field of historic preservation. Through a combination of general and survey courses and specific practical applications (including a required field internship), the student will begin to understand the multitude of forces acting upon cities, towns, and rural areas that either encourage or hinder the preservation of historic sites at the beginning of the 21st century. And of course, Charleston, one of the cities most closely associated with the preservation movement in America, serves as the perfect laboratory for the study of preservation and urban design issues.

The Department of Theatre offers a vital, exciting program, which develops the theatre practitioners of the future. From acting to design, from directing to playwriting, students encounter ideas, theories and techniques that will enable them to achieve excellence in a most competitive arena. Students often work with visiting actors, writers, and directors and have the opportunity for international study as well as faculty-supervised trips to major theatrical centers. Students also compete in events sponsored by the Southeastern Theatre Conference, the Association for Theatre in Higher Education, and the Kennedy Center/American College Theatre Festival.

Students may earn a Bachelor of Arts degree in Theatre with concentrations in performance, scenic/lighting design and technology, costume design and technology, theatre for youth, or general theatre studies.

In addition, students have opportunities to work with Spoleto Festival USA, the Piccolo Spoleto Festival, numerous professional and community theatres or on films from major studios shooting in and around Charleston.

The overall learning goals for our School of Business and Economics are as follows:

- Global Awareness
- Problem-solving Ability
- Ethical Awareness and Social Responsibility
- Effective Communications

All programs in the School of Business and Economics at the College of Charleston are accredited by AACSB, (The Association to Advance Collegiate Schools of Business) International, the most prestigious accrediting body for business schools. With 1,485 current majors and 68 minors from outside of the School, the School of Business and Economics is building its reputation for excellence with distinctive programs that emphasize ethical and global awareness and the development of effective communication and problem-solving abilities. Outstanding opportunities are available to our students through internships, study abroad programs and mentoring relationships with alumni and the business community.

**Beta Gamma Sigma**

Beta Gamma Sigma is the honor society for students enrolled in business and management programs accredited by AACSB International.

**Admission Standards**

The School of Business and Economics has admission standards to attract and retain students with the ability and commitment necessary for success in business and economics. The standards include the following requirements:

Completion of the following courses with no grade less than a "C-":

- MATH 104 or 250
- MATH 105 or 120 or HONS 115
- ECON 200 or HONS 211
- ECON 201 or HONS 212
- ACCT 203*
- ACCT 204*
- DSCI 232 or HONS 214

*NOTE: Economics majors are not required to take ACCT 203 or ACCT 204.

Please note, students must earn a C- or better in all of the above classes in order to be officially admitted to SBE. Although a D is a passing grade, do not continue in the next course of a sequence until you have made the required C- or better in the prerequisite. For example, if you make less than C- in ECON 200, do not take ECON 201 until you make a C- or better in ECON 200. In addition, a passed admissions course may be repeated only once in the attempt to earn the required minimum grade; failure to earn the required grade on the second attempt will result in ineligibility to declare a SBE major. Refer to Course Repetition Policy in the catalog under Academic Regulations.

Students should declare their intent to major in the School of Business and Economics at the Student Success Center, preferably during their sophomore year. Once a student has completed the prerequisite courses (having obtained a C- or better), the student may formally declare a major within the School of Business and Economics. Students who have not yet completed the above listed core courses may only take up to 9 hours of upper-division business courses (300 level or above). Exceptions to this 9-hour limit will be made to allow completion of degree requirements for College of Charleston students with programs outside of the School of Business and Economics. Students who have successfully completed the stated requirements will be admitted into a major in the School of Business and Economics.

Any student who is interested in the programs at the School of Business and Economics should contact the Student Success Center for more information on programs, policies and procedures. There will be mandatory advising, monitoring of progress and registration restriction for those who choose this academic path.

Betsy Jane Clary, Director

The School of Business and Economics (SOBE) Honors Program offers a unique, rigorous, and challenging academic experience to a select group of College of Charleston students. The program offers accelerated curricula, independent research opportunities, and individual mentoring experiences with faculty and with alumni for high-caliber, very motivated students who pursue any major within the school.

Each year a group of approximately 20 students is admitted into a four-year program which begins with a summer reading project prior to arriving on campus and continues through the presentation of an honors thesis or capstone project during the senior year.

Students who are accepted into the College of Charleston Honors College and note a preference for any major in the School of Business and Economics are automatically considered for the SOBE Honors Program. Acceptance into this program is based on academic achievement and participation in the School of Business and Economics.

International Study Abroad

The School of Business and Economics is committed to providing study abroad opportunities for our students. Study abroad significantly adds to students' educational experience, expanding perspectives in important ways. In a global economy, international experiences can be key to success in business. Effective fall semester 2009, all International Business majors are required to participate in a study abroad activity.

- Advanced, prior to departure, approval must be obtained on all courses in which the student plans to enroll abroad in consultation with the School of Business and Economics Global Studies Office.
- Failure to establish prior approval may result in the delay, failure or inadequate posting of credits from study abroad to the College of Charleston record as well as delays in registration for future semesters.
Two additional courses from the following:

1. The curriculum content stimulates interest in social, political and economic issues since many of the major problems and challenges facing the nation and the rest of the world today are either partially or wholly economic in nature.
2. The program teaches analytical methods and concepts that are important in preparing students for administrative positions in business and government.
3. Majors receive a solid foundation for graduate study in economics.

Economists work in manufacturing, transportation, communications, banking, insurance, retailing and investment firms, as well as in government agencies, trade associations, educational institutions, and consulting organizations. Economists provide valuable assistance in analyzing and interpreting the impact of the business cycle, government policies and international developments on consumer demand, prices, costs, competitive pressures and financial conditions. The Department of Health and Human Performance offers a major in physical education, with concentrations in Exercise Science, Health Promotion, and Teacher Education, a major in athletic training, and a minor in health. The Department also offers a wide range of activity courses that enrich the overall student experience at the College of Charleston. The department makes a unique contribution to the liberal arts and sciences educational experience, as it is the only discipline devoted specifically to the study of athletic training, exercise science, health promotion, and teacher education (movement pedagogy). Its primary mission is the academic preparation of candidates interested in athletic training, exercise science, physical education pedagogy, and health promotion. The Department of Health and Human Performance provides excellent academic training and experiences for students who wish to pursue advanced studies in medicine (physician assistant, physician), physical therapy and other allied health professions.

Core Requirements for Athletic Training and Physical Education (19-20 hours):

Candidates must make application to and be selected into this program.

Upon completion of the ATEP, the candidate is eligible for the National Athletic Trainers Association, Board of Certification (NATA-BOC) administered certification examination. Once a student athletic trainer passes the certification examination, s/he may use the designation “ATC.”

Therefore, candidates interested in the Athletic Training Education Program should meet with the athletic training program director as soon as possible.

The number of candidates accepted into the program each year is limited and is based upon the availability of clinical supervisors and quality clinical educational opportunities. The clinical education component of this program provides candidates the opportunity to participate in extensive clinical experiences in both traditional collegiate, high school, and semi-professional venues and the non-traditional setting of the sports medicine clinic, as well as other athletic health care settings. Program candidates are responsible for their own transportation to and from the clinical venues. Once accepted into the program students are responsible for their own transportation to and from the clinical venues.

Candidates seeking admission into the program must meet the following selection criteria:

1. Be enrolled at the College of Charleston working towards a degree.
2. Possess a current overall GPA of 2.50.

8. Complete an interview with the athletic training education program staff and faculty.

*Meeting selection criteria does not guarantee admission to the program.

Bachelor of Science in Physical Education Major Requirements

Candidates may elect to enter a concentration in exercise science, health promotion, or teacher education (movement pedagogy). Prospective majors should plan to take PEHD 201 early in their studies because it is a prerequisite for all PEHD courses 300-level or higher. Regardless of the concentration selected, all physical education majors take a common core of courses. In addition to the major core of 19 hours, candidates are required to take a professional track sequence of 17–24 hours depending on the concentration selected, and a minimum of 12 hours of coursework in a related cognate area.

Exercise Science Concentration Requirements: 32 hours

Candidates in the exercise science concentration should plan to continue their studies in a graduate or professional program in exercise science, physical therapy, occupational therapy, physician’s assistant, or medical school. The academic advisor will recommend courses that will fulfill degree requirements at the College and also the prerequisites for entrance into a graduate or professional program. Applications for an exercise science internship will be taken during the fall of the junior year. Interns have an opportunity to work in several different rehabilitation centers in the area.

In addition to the 19 hours of core courses required for the major:

PEHD 210 Concepts in Fitness Assessment and Exercise Prescription

PHYS 101/L Introductory Physics w/lab
PHYS 102/L Introductory Physics w/lab

Health Promotion Concentration Requirements: 30 hours

Given the enormity of the health problems facing this nation and the possibility of future employment that emphasizes health promotion and wellness, the department has developed a professional track of study for the physical education major who wishes to expand his or her knowledge in the health promotion field.
Health education is an exciting and growing profession that can lead to jobs in public health agencies, voluntary nonprofit organizations, schools/colleges/universities, medical care settings, business/industry, and more. Health promotion is a specialized area within this field that prepares candidates to design, implement, and evaluate programs and policies that impact public and community health.

Candidates in this concentration complete a cognate of 12 hours in sociology or psychology. However, with the careful selection of courses, a candidate may also complete a minor (18 hours) in either area.

**Requirements: 30 hours**

In addition to the 19 hours of core courses required for the major:

- **HEAL 225** Consumer Health
- **HEAL 240** Worksite Wellness

- **EDFS 460** Clinical Practice in the Content Area

*In order to take these courses, the student must be accepted as a candidate in the Teacher Education Program. Please see “Requirements for Admission to Teacher Education Programs.”

*NOTE: Completion of approved programs does not automatically ensure certification recommendation by the department and School of Education, Health, and Human Performance. Although completion of the approved program of study will usually result in recommendation, it may in fact be withheld as the result of failure to satisfactorily complete the requirements. If a candidate does not adhere to the activities as described by the faculty review committee, for example, by a) substandard performance during clinical practice, b) failure to pass the area exams (Praxis Series), or c) failure to change behaviors which are considered to be impediments to successful teaching, recommendations may be withheld.*

**Health Minor Requirements: 18 hours**

This minor is available to any student not majoring in physical education or athletic training.

In order to declare a health minor, the student must meet with the health coordinator to complete a program of study.

*NOTE: The maintenance of a minimum GPA of 2.00 in the health minor coursework is required for successful certification of the health minor on the student’s transcript.*

**Minor Requirements: 18 hours**

The minor must include the following four courses:

Anthropology, through its global and comparative approach, explores human biological and cultural diversity both in the past and in the present. Anthropology is traditionally divided into four subdisciplines (biological anthropology, archaeology, anthropological linguistics and cultural anthropology) through which it is linked to other social sciences, the natural sciences and humanities.

Anthropology Major Requirements:
34 hours
ANTH 101  Introduction to Anthropology
ANTH 201  Comparative Social Organization
ANTH 202  Archaeology
ANTH 203  Introduction to Biological Anthropology
ANTH 204  Language and Culture
ANTH 210  History of Anthropological Theory
ANTH 491  Research Methods or
ANTH 493  Field School in Archaeology

Twelve additional hours of 300-level (or higher) anthropology courses, one of which must be a geographic area course (320s).

NOTE: Students majoring in anthropology are encouraged to include courses in sociology, history, political science, international studies, psychology, economics, statistics and computer programming in their program of study. The anthropology faculty very strongly recommends that anthropology majors take MATH 104 Elementary Statistics or a higher level statistics course as one of the two math courses fulfilling the general education requirements. This requirement should be fulfilled as early in an individual’s program as possible and certainly within the first two semesters after declaration of an anthropology major.

Anthropology Minor Requirements:
18 hours
ANTH 101  Introduction to Anthropology
Any two 200-level courses in anthropology
Electives: nine additional hours in anthropology.

Communication is the inheritor of a long and honored tradition. Since the ancient Greeks, the study of rhetoric (the art of effective discourse) has been recognized as a key element of humane learning. Rhetoric formed one of the seven liberal arts of education in medieval Europe. Modern communication curricula explore the nature of human communication, its media and its effects. The major in communication equips students for graduate study or careers in organizational and industrial institutions, public relations and advertising agencies, the mass media, corporate and organizational communication.

The study of history provides a unique perspective and understanding of the human condition, past and present. The examination and comprehension of history aids in the development of the research, analytical, and communicative skills needed in many fields. Libraries, historical societies, museums, archives, and similar institutions provide career options for the history major, as do government service, journalism, ministry, education, politics, and the theater. A background in history also affords an excellent preparation for either medical or law school. Furthermore, many businesses hire people with a good background in an area of the humanities such as history.

NOTES:
1. Students should review the Handbook for History Majors on the department website.
2. All history courses except 101–102 and 103–104 satisfy the humanities requirements.

Major Requirements: 30 hours
(Exclusive of HIST101–102 or HIST103–104)
Three hours from each of the following five areas of distribution (15 hours total) chosen in consultation with his/her department advisor:
Pre-Modern (before 1500)
Modern Europe (since 1500)
Modern Asia, Africa, Latin America
United States
Comparative/Transnational
9 hours history electives (chosen by the student in consultation with his/her department advisor) from any of the above four areas.

HIST 299 The Historian’s Craft, is required of all majors and minors and must be successfully completed before enrolling in the research seminar.
Three hours in a research seminar normally taken in the senior year, which requires the writing of a substantial paper.

NOTES: Majors must have passed at least one 200-level course before taking a 300-level course and have passed at least one 300-level course before taking a 400-level course. All majors must take HIST 299 no later than concurrently with their third history class numbered 200 or higher. All majors must have taken at least two related (one 200-level and one 300-level) courses before seeking permission to take a research seminar, senior paper, or bachelor’s essay. Exceptional students and qualified students who have a particular research interest that cannot be addressed in research seminars being offered may, if authorized by the department, satisfy this requirement by completing HIST498 Senior Paper.

**Geography Minor Requirements: 18 hours**

A minor in geography requires detailed study of particular places at different scales, from the Lowcountry to Africa, and teaches students to understand and appreciate the physical and social processes that shape the world we live in. Students are introduced to the discipline of geography through World Regional Geography, a required course. All declared minors also take Reading the Lowcountry Landscape, which is a field-intensive methods course that builds geographic skills by analyzing the various processes that have shaped the Lowcountry. The minor is offered by the Department of Political Science and administered by a steering committee of faculty. Additional geography electives and cognate courses may be proposed by other departments for inclusion at any time.

Students are required to take one systematic course in geography: environmental, political or urban geography. From there, students choose geography and cognate electives for a total of 18 hours in the discipline.*

Sociology is the scientific study of human social behavior. It focuses on the factors that organize and structure social activities, as well as those that disorganize and threaten to dissolve them. As a social science, sociology applies objective and systematic methods of investigation to the discovery and identification of regularities in social life and to the understanding of the processes by which they are established and changed.

At the College of Charleston, competence in a foreign language is considered fundamental to a liberal arts education and a means to attaining the global perspective required of 21st-century graduates. The language program at the College is one of the most comprehensive in the southeastern U.S., with in-depth majors in classical and modern languages, overseas study programs, specialized programs for future language professionals, and offerings in several less commonly taught languages. Depending on their level of skills upon admittance to the College, students are required to take as many as four semesters of language study or its equivalent. When students graduate with majors or minors from the School, they will have had direct experience with diverse societies, regions, and cultures. They will be able to communicate competently and confidently in at least one foreign language, be knowledgeable about world affairs, and have holistic understanding of one or several cultures.

Mission Statement

The School of Languages, Cultures, and World Affairs prepares students to become knowledgeable, engaged citizens in an increasingly interconnected global society. The mission of the school requires students to critically examine themselves and their place in the world.

Literature in Translation

The College offers courses which, in English translation, provide access to the literature of other languages. They can be applied to the general education requirement in humanities, but not in foreign language. Typically, several such courses are scheduled each semester, covering significant authors and literary works from Western Europe, Russia, China, Japan, Latin America and the Arabic world. They are listed in this catalog under the original languages in which the works were written. Consult the Schedule of Courses under each language for courses offered in any given semester. Types of literature in translation courses include the following:

- **Literature in Translation: Gallery of World Literatures**
  - Study of selected works from a number of literatures that offer different perspectives on the world and humankind.

- **Literature in Translation: A Foreign Literature**
  - Study of selected works, representing major literary periods and genres, which illuminate another language and culture or era of a shared human condition (e.g. LTFR 250 French Literature of the 18th Century).

- **Literature in Translation: A Foreign Author**
  - Study of selected works by an author whose influence is felt in the world at large (e.g. LTRS 350 Dostoyevsky).

- **Literature in Translation: Comparative Literature**
  - A study of selected works by major authors representing different cultures with emphasis on common themes as viewed from the perspectives of these writers.

Majors in French, German, and Spanish will take a proficiency exam in their last year prior to graduation. There is no cost to the student to take this exam. The Department of German and Slavic Studies was established in 2006 and provides students with opportunities to study the language, literature, cinema and culture of German-speaking Europe and Russia. America has many long-established social and cultural ties with the nations of the German-speaking world: Austria, Germany, and Switzerland. Today, a knowledge of German has become important for anyone engaged in international commerce, research and technology. The Department offers a Major in German, a Minor in German, and a Minor in German Studies. The Russian Studies program is a multidisciplinary course of study, which combines the Russian language with courses related to Russian civilization, culture, history, politics and economic. A major goal is to provide an understanding of the relationship between the United States and Russia in the aftermath of the Cold War.

The role of the School of Sciences and Mathematics is two-fold: to provide the technical dimensions of a liberal arts education to all students in the College and to equip majors in the sciences and mathematics to enter careers, graduate schools, or professional schools. Students are afforded opportunities for significant involvement in learning in the classroom as well as individual attention by faculty in research in their academic areas. Students in all disciplines learn not only the facts, methods and boundaries of mathematics and science, but learn to question and to think analytically.

Students are encouraged to take advantage of opportunities for research and independent study with faculty to develop creativity and an understanding of scientific inquiry. Activities that offer close interactions with faculty increase student satisfaction with their college experience. Students considering a career in science should take mathematics and at least one science course during their first semester.

Mission Statement
Our mission is to integrate discovery, innovation, and education in order to serve our students, our state and our nation.

Vision
Our vision is to be a community of scholar-teachers committed to creating an environment of distinctiveness and excellence that supports and nurtures students as scholars and encourages learning through inquiry, all within the framework of a broad liberal arts and sciences education.

Biology is of fundamental importance in a liberal arts education, since by its very nature it provides students with a keener insight into and a deeper appreciation of the many facets of living systems. For the non-major, biology often serves as the only introduction to science and methods employed in scientific endeavors. For both non-majors and majors alike, a study of biology may provide life-long vocational interests. Those who major in biology are provided with a substantial background in all aspects of living organisms.

A biology degree is not only valuable for advanced studies, but also provides a background for the pursuit of a variety of careers in teaching, marine biology, medical and biological research, allied health services, forestry, wildlife biology, horticulture, pollution control, museum work, environmental studies and land-use planning.

The Department of Biology has extensive facilities in the Hollings Science Center and at the Grice Marine Laboratory (GML) at Ft. Johnson. Undergraduate courses are given in both locations.

Students who are considering majoring in biology should visit the Department of Biology early in their college careers to consult with advisors and to obtain information necessary to plan their programs of studies.

To many people, computer science means computer programming. Computer science is more than programming, however. It is a science pertaining to computers and computation. This includes the study of algorithms, the process of computation, the representation and organization of information, and relationships between computers and their users.

The programs in computer science are designed to serve the needs and interests of a broad spectrum of students who see the probable interaction of computers in their present or proposed careers, while ensuring a sound foundation for those students who seek to major in computer science by providing sufficient breadth and depth in the discipline for success in industry and graduate school.

The bachelor of science in computer science is designed to prepare students for graduate study in computer science or for professional careers, especially in the computer industry. 

NOTE: The bachelor of science in computer science program is accredited by the Computing Accreditation Commission of ABET.

The bachelor of science in computer information systems is designed to prepare students for computing positions in business and industry while keeping open the option for continuing study in graduate school.

The bachelor of arts in computer science is designed to provide students with solid foundations in the fundamental areas of computer science, but permits a greater variety of elective courses to be taken outside of the discipline than do the other two degree programs.

There are two minor programs in computer science, one intended primarily for business majors and one for other majors.

As the 20th Century was the Industrial Revolution, the 21st Century will prove to be the Information Revolution. Do you strive to become a leader in this ongoing revolution? Are you interested in learning how to glean useful new information from vast amounts of data for intelligent decision-making? Discovery Informatics is a rigorous, interdisciplinary program, which will be the catalyst and enable for discoveries that might otherwise go undiscovered and for knowledge that would otherwise remain unknown. This is the first undergraduate degree program of its kind in the country, drawing on the unique and rich intellectual culture and history embodied at the College of Charleston.

The mission of the Discovery Informatics program is to provide students with the theoretical foundations and practical application experiences needed to understand and utilize methods for knowledge discovery. The core of the program integrates statistics, mathematics, computer science, learning theory, logic, information theory, complexity, and artificial intelligence. In addition to completing the core requirements, students choose a cognate discipline and associated courses, culminating in a Discovery Informatics project directed by a faculty member from their chosen cognate. Cognates and their directors are listed below.

Today’s demand for expertise in Discovery Informatics far exceeds the current supply, and this discrepancy will become more severe over the coming decades. Discovery Informatics graduates will be highly employable in business, industry, professional fields like medicine and law, and government. Graduates wishing to pursue higher degrees in Discovery Informatics (or more domain-specific fields like bioinformatics) will be among the most qualified applicants for the best graduate degree programs.

GeoInformatics Cognate
(16–17 credit hours)
Director: Norman Levine
GeoInformatics technologies include Geospatial Information Systems (GIS), Global Positioning System (GPS), and remote sensing. Furthermore, the cognate includes issues in geospatial data delivery and documentation. In order to complete this cognate area, students will need a background in geology; students are advised to take GEOL 101 and 105, or GEOL 103 and 105, with the mandatory laboratories to satisfy their general education requirements. The cognate has three tracks: Geospatial Informatics, Hydro-Geophysical, and Applied Environmental GeoInformatics. The requirements for each track are:

Geospatial informatics track:

GEOL 314  Introduction to Remote Sensing (4)
GEOL 442  Geological Application of Remote Sensing (4)
GEOL 449  Geographical Information Systems (4)

a geophysics elective, chosen in consultation with cognate advisor

Hydro-Geophysical track:

GEOL 412  Crustal Geophysics (3)
GEOL 438  Hydrogeology (4)
GEOL 441  Aqueous Geochemistry (4)
GEOL 444  Quantitative Hydrogeology (3)

GEOL 441  Aqueous Geochemistry (4)
GEOL 449  Geographical Information Systems (4)

Molecular Biology Cognate
(15–16 credit hours)
Director: Allan Strand
Bioinformatics makes use of large genetic datasets to address questions in biology at the cellular and molecular level. To expose DI students to training in bioinformatics, we suggest that students take Biology 111 and 112 with the mandatory laboratories to satisfy their general education requirements. The list of requirements is:

BIOL 111/111L  Introduction to Cell and Molecular Biology with Lab (4)
BIOL 112/112L  Evolution, Ecology, and Biology of Organisms with Lab (4)
BIOL 305/350L  Genetics with Lab (4)
Organismal Biology Cognate
(15–16 credit hours)
Director: Allan Strand

Historically DI has been relevant to biology through the field of bioinformatics, but large datasets can be found in many biological sub-disciplines that focus upon levels of organization higher than the cell. Large datasets, particularly ecological time-series and imagery, have proliferated in environmental biology. For students to receive the training they would need to apply DI approaches to organismal-level subfields, we recommend that students take Biology 111 and Biology 112 as part of their general education requirements. The list of requirements is:

- BIOL 111/111L Introduction to Cell and Molecular Biology with Lab (4)
- BIOL 112/112L Evolution, Ecology, and Biology of Organisms with Lab (4)
- BIOL 211/211D Biodiversity, Ecology, and Conservation Biology (with discussion) (4)

Physics and Astronomy Cognate
(18 credit hours)
Director: Jon Hakki

The Physics and Astronomy cognate, offered by the Department of Physics and Astronomy, provides students with a working knowledge of basic physics and astronomy as well as some familiarity with associated data types. Students in this cognate are advised to take Physics 111 and Physics 112 to satisfy their general education requirements. The department is also in the process of expanding course offerings in computational physics; it is expected that anticipated computational physics courses would replace some of the aforementioned courses and/or would serve as ideal cognate requirements when implemented.

- PHYS 112 General Physics II (4)
- PHYS 230 Introduction to Modern Physics I (3)
- ASTR 311 Stellar Astronomy and Astrophysics (3)

Psychology Cognate
(13–22 credit hours)
Director: Kim May

The Department of Psychology offers a psychology cognate. Psychology, as a scientific discipline that studies human and animal behavior and biobehavioral relationships, relies significantly on accumulating and querying extensive databases in subfields of psychology to address salient research questions (e.g., in neuroscience, cognition, health, and social psychology). To provide training that DI students would require, students will take PSYC 103 (Introduction to Psychological Science) as part of their general education social science requirement. PSYC 211 (Psychological Statistics) and PSYC 220 (Research Methods) are required but can be excused if students present appropriate background in statistics and/or experimental methods. Other courses include:

One of the following with accompanying laboratory:

- PSYC 213 Conditioning and Learning and PSYC 360 Laboratory in Conditioning and Learning (4) or
- PSYC 214 Physiological Psychology and PSYC 364 Laboratory in Physiological Psychology (4) or

Geology is the science of the Earth – including its structure, dynamics, and history at many scales of inquiry. Geoscientists provide a unique perspective on using science and mathematics to solve common problems affecting society locally, regionally, and on a global scale. Because of the relatively low faculty to student ratio, students have the opportunity to actively participate in faculty guided geoscience research.

The Department of Geology and Environmental Geosciences offers a major, a minor, and a broad array of topical and interdisciplinary elective courses in the geosciences. Students who complete a bachelor of science or bachelor of arts degree with a major in geology may tailor a program of study to better prepare themselves for a wide variety of career opportunities in:

1. Advanced graduate study – Our students have received graduate fellowships from universities throughout the U.S.
2. Industry and government using geospatial technologies
3. Environmental consulting firms and state or federal environmental regulatory agencies and hazard mitigation.
4. Interdisciplinary careers such as oceanography, national intelligence, and resource management

Mathematics is one of the oldest academic disciplines, valued for its intrinsic beauty, as training in logical and analytical reasoning, and for its widespread applications throughout other disciplines. As our society adopts more technology and collects more data, training in mathematics becomes ever more valuable.

At the bachelor’s level, the Department of Mathematics offers a major, two minors, and a number of service courses for various disciplines. Students who complete a bachelor of science in mathematics have a number of career options.

1. They may pursue an advanced degree in mathematics or a closely related area such as statistics, computer science, biometry, information science, or operations research.

2. Students who combine mathematics with another discipline that uses mathematics can enhance their pursuit of graduate studies in the second discipline. These areas include biology, chemistry, economics, medicine, physics, and even such areas as sociology, political science, and psychology.

3. Mathematics majors may teach at the secondary level.

4. Mathematics majors may work in business, industry, or government, areas which increasingly need people with skills in quantitative reasoning and problem solving to deal with statistics, technology, and complicated finances. Often the analytical reasoning developed by a mathematics major is more important to these companies than any specific mathematical technique.

5. Many mathematics majors work in the computer industry, in such areas as systems analysis, programming, design of algorithms, or computer graphics. The computer industry is one of the largest employers of mathematicians.

6. Many mathematics majors work as actuaries in the insurance industry, applying mathematics and statistics to risk assessment and financial analysis.

To meet the varying needs of mathematics majors with different career goals, the Department of Mathematics offers five tracks leading to the bachelor of science degree. All students wishing to graduate with a major in mathematics must complete one of the five tracks. These tracks are built around a common core of courses required of all math majors. The core courses and requirements for each track are listed below.

Students interested in the mathematics major are not required to select a track immediately. Instead, they may focus on the first five core courses. Typically, a mathematics major should complete these core courses by the end of the sophomore year. Entering majors should enroll in one of these courses or MATH 111, the prerequisite for MATH 120.

The calculation of the GPA in the major will be based only on those mathematics courses that are acceptable for credit toward the major.

Major Requirements:
Students must complete the core courses plus one of the five tracks (actuarial, applied, discrete, pure, teacher education). See also “Academic Regulations” section of this catalog.

Preparation for MUSC Master's in Biometry Program

By carefully choosing the coursework in our B.S. in mathematics, a student may also be able to obtain an M.S. degree in biometry from the Medical University of South Carolina, with coursework for both degrees completed within five years. This is not a formal program, but rather a consequence of careful planning. College of Charleston math majors interested in both degrees should apply for admission to the College of Graduate Studies at MUSC during the spring semester of their junior year, and this admission is not automatic. For more information, contact the mathematics department at the College of Charleston or visit MUSC's Web page.

Physics is the present-day equivalent of what used to be called natural philosophy, from which most of modern science arose. It investigates the properties, changes, and interactions of matter and energy. The study of physics does not involve following a recipe; rather, it entails developing an attitude or way of looking at phenomena and asking questions. Physicists seek to understand how the physical universe works, no matter what the scale of observation—from quarks to quasars, from the time it takes a proton to spin around to the age of the cosmos. Awareness of the beauty, harmony, and interplay of the laws of physics greatly enhances our view and appreciation of our environment. Astronomy and astrophysics are physics disciplines that seek to understand the natural world beyond the Earth's boundaries.

The four degree programs offered by the Department of Physics and Astronomy enable a student to prepare for a career in physics or astronomy or for a career in related fields such as engineering, biophysics, agriculture, medicine, law, geophysics, meteorology, and business.

The school houses a laboratory that offers training in Geographic Information Systems (GIS).

**Pre-Allied Health Programs**

The College of Charleston provides pre-professional program education that prepares a student to enter a wide variety of allied health education programs. This includes, but is not limited to: physician assistant, physical therapy, occupational therapy, speech therapy, perfusion, health administration, and the medical laboratory science of cytotechnology. After completing their prerequisites, students must apply to the allied health program of their choice at an institution where it is offered. Admission to such programs requires application and successful competition for admission. Interested students should contact the director of Pre-professional Health Advising for additional information.
Pre-Professional Nursing Curriculum

The College of Charleston does not grant nursing degrees, but offers courses that prepare students for entry into colleges of nursing. Students planning to pursue a degree in nursing should contact each program of interest for a list of specific prerequisites. Typically, a pre-nursing student at the College of Charleston should expect to take the following courses, as well as additional courses specified by the nursing programs and/or by their major:

Pre-Professional Curriculum for Dentistry, Medicine, Optometry, Osteopathy, Podiatry and Veterinary Medicine

The College of Charleston offers courses that prepare students for entry into professional schools while they major in a regular academic discipline. Students are reminded that there is no actual "pre-med" major, for example. Majoring in science is the most common approach; however, students can major in any field such as the arts, business, or science, as long as the course of study includes the general coursework required by the intended professional school and prepares them for the required standardized tests. The Departments of Biology, Chemistry and Biochemistry, and Physics and Astronomy each offer particularly attractive, but different, routes to strong bachelor's degrees that will qualify students for entry into professional schools. Coursework must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>

<tbody>
<tr>
<td>Biology</td>
<td>8</td>
</tr>
<tr>
<td>Chemistry</td>
<td>16</td>

<td></td>
</tr>
</tbody>
</table>

Mathematics Two courses, including calculus (statistics is recommended)

Physics 8 hours

*Biochemistry 0–8 hours

*Genetics 4 hours

Students should take these courses as early as possible in the academic career by including mathematics and at least two science sequences (biology, chemistry, and physics) in their freshman year.

*Recommended for dentistry, medicine and veterinary medicine.

Pre-Pharmacy Curriculum

The College of Charleston offers courses that prepare students for entry into pharmacy school after three years of study at the College. Students should consult the pharmacy schools to which they intend to apply for admission for specific coursework and admissions test requirements. Normally, students must include the following coursework as a minimum:

<table>

English composition 6 hours

Anatomy/Physiology 8 hours

Verbal Skills 3 hours

Liberal arts electives 9 hours

Mathematics 2 courses

(including calculus and statistics)

Physics 8 hours

Psychology 3 hours

Students should take these courses as early as possible in the academic career by including mathematics and at least two science sequences (biology, chemistry, and physics) in their freshman year.

SEA Semester

843-953-5586 or 843-953-9194

SEA Semester is a program sponsored by the Sea Education Association (SEA), a non-profit organization located in the oceanographic research community of Woods Hole, Massachusetts. Affiliated with the College of Charleston, Cornell University, Boston University, and others, SEA Semester is a 12-week, full-credit undergraduate program focusing on oceanographic and maritime studies. At SEA's Woods Hole campus, students undertake coursework in oceanography, nautical science, and maritime literature and history, followed by a practical component of marine science and blue-water sailing aboard one of SEA's sailing oceanographic research vessels (either of the 134-foot steel brigantine tall ships, the SSV Corwith Cramer or SSV Robert Seamans). For more information, please go to www.sea.edu.

NOTE: Any student at the College of Charleston is eligible to apply for participation in SEA Semester. No sailing experience is necessary for enrollment in SEA Semester.

Grice Marine Laboratory

www.cofc.edu/grice

Located at Fort Johnson on James Island, about 10 miles from the main campus, the Grice Marine Laboratory houses classrooms, student and faculty research laboratories, faculty offices, an aquarium room, and a research collection of marine invertebrates and fishes. The Grice Lab supports teaching and research in marine sciences. The marine lab also offers limited housing to students in its programs. The Grice Lab is the home of the graduate program in marine biology and is where many of the courses for the undergraduate marine biology major are taught.

**Linguistics**

http://lcwa.cofc.edu/linguisticsminor

**Director:**

Elizabeth Martínez-Gibson

Linguistics is an interdisciplinary minor designed to examine the importance of language in all aspects of life and to contribute to the students’ expansion of the understanding of the global community. Linguistics is the study of language in its many different disciplines and environments. It is no longer simply a study of the theoretical issues of pronunciation and grammar, but it is also a study of how we acquire language, the learning process, societal effects, the evolution of language, the behavioral patterns involved, the importance of language in the computer age, and the biological aspects of language.

The idea of this minor is to bring together all of these disciplines with one common theme, language. Through this field of study it is the intent that students will realize the importance of language in all fields of study and will be able to apply their knowledge in their careers and everyday life to communicate and understand the world as a whole.

**Requirements: 18 hours**

Students will take the following sequence of courses for a total of eighteen (18) credits:

**Note:** This should be one of the first courses taken.
URST 310 URBAN PLANNING (3)
Topics will include the history of planning, macro theories of planning, goal setting and implementation within contemporary political settings. Primary emphasis will be placed upon the application of planning techniques within agencies and within urban communities; appropriate case studies will be used.

URST 398 SPECIAL TOPICS IN HUMANITIES (3)

URST 400 PRACTICUM (2)
This is a supervised field-learning experience in an urban setting. The student observes and becomes involved in the functions and operations of a private sector, governmental or community agency. The weekly seminar provides a forum in which the student, in concert with the faculty coordinator, can integrate knowledge gained in the classroom with that acquired during the field experience.

NOTE: Students must obtain instructor’s permission the term before enrolling in this course.

URST 401 INDEPENDENT STUDY (3)
