Physics Teacher Education Program (Grades 9-12)

Students interested in teacher certification in physics must complete both the physics major and the secondary education cognate major requirements. See the School of Education, Health and Human Performance section of this catalog for a listing of the required secondary education cognate major courses. Students should apply for acceptance to this program no later than the second semester of their sophomore year. Requirements for this include admission to and successful completion of the approved teacher education program. Students must successfully complete all requirements for certification in secondary education.

When declaring teacher certification in English through the Program of Study Management System (POSM), students must first select “Declare or Add a Major” and then “Secondary Education Cognate” from the major list. Once this selection is made, a second menu box will appear with a list of the associated majors. Select the physics major and follow the on-screen instructions.
